NTPC-NPCIL JV floats ₹28,000-crore tender

SAURAV ANAND
New Delhi, July 16

ANUSHAKTI VIDHYUT NIGAM (ASHVINI), the joint venture between NTPC and Nuclear Power Corporation of India (NPCIL), has invited bids for a ₹28,000-crore engineering, procurement and construction (EPC) package for the 2.8-GW Mahi Banswara Nuclear Power Project in Rajasthan, marking the largest nuclear-island tender under India's indigenous reactor programme.

The package covers the primary infrastructure for four 700-MW pressurised heavy water reactors (PHWRs) based on indigenous technology. It includes the nuclear building raft, reactor building internal structures, the heavy-water upgrading plant, plant-water systems and waste-management facilities. The nuclear island houses the reactor and systems needed to produce steam and ensure safe plant operation.

According to the tender document released on Thursday, the two-part bid covers the "engineering, design, supply, inspection, testing, packing, forwarding, transportation to site, guarantee, storage, fabrication, civil works, erection, examination, testing, commissioning, operation and maintenance as per the tender specification of nuclear island mega EPC package (NIMEP)" for the project.

NPCIL, in a post on X, said the package, estimated at more than ₹28,000 crore, is the largest ever floated under India's indigenous PHWR programme. "The comprehensive package covers engineering, manufacturing, supply, civil construction, installation, testing and commissioning assistance of critical nuclear island systems for four PHWR units of 700 MWe capacity each," it said.

The Mahi Banswara project will be the first nuclear power plant in India that is not wholly owned by NPCIL. The state-run company currently owns the country's entire installed nuclear power capacity of 8.8 GW.

The tender comes as the Centre seeks to scale nuclear capacity to 100 GW by 2047 to strengthen energy security and support the transition away from fossil fuels. Nuclear plants generated 56,681 million units in 2024-25, accounting for 3.1% of total electricity generation.

REACTOR PUSH

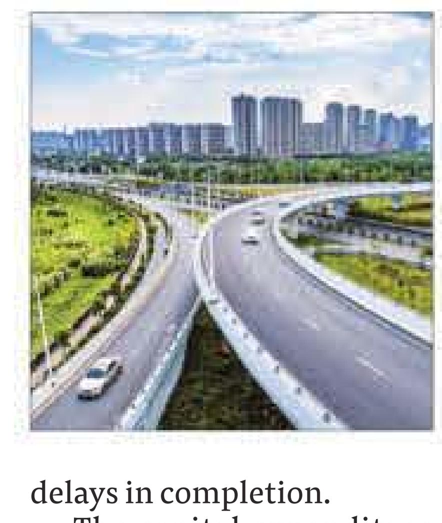
- The project includes four **700-MW** indigenous pressurised heavy water reactor units together
- India currently operates 24 nuclear reactors with **8.78 GW** installed capacity
- Another 10 nuclear reactor units totalling **8,000 MW** remain under construction
- Centre targets **100 GW** nuclear power capacity by 2047 mission deadline

Highway construction pace declines 45% in April-May

FE BUREAU
New Delhi, July 16

THE PACE OF highway construction in the first two months of this financial year fell 44.9% on-year to 740 km and the pace of award of new road projects also went down by 19.1% to 369 km, according to the government data.

Experts attribute the slower pace of construction to the muted central road award activity of the past two years. Key reason for drop in awarding is change in approach of the government. It is now insisting that all land acquisition and other clearances are in place before a project is awarded to reduce delays in completion.



The capital expenditure by the Ministry of Road Transport and Highways (MoRTH) during the first two months was down 0.6% on-year to ₹59,090 crore, according to quarterly update of performance monitoring dashboard of infrastructure sector by Ministry of Statistics and Programme Implementation (MoSPI).

Road project awarding has slowed down in the last two fiscal, which is impacting the order-book of road contractors. Consequently, the execution is likely to witness continued pressure in FY2027 as well, after witnessing contraction for second consecutive year in FY2026.

Moreover, elevated bitumen prices and along with supply constrain related to bitumen availability during April-May 2026 also impacted road construction activity, senior vice president ICRA, Ashish Modani said.

Taxpayers allowed to view foreign assets info

SHUBHAM RANA
New Delhi, July 16

THE CENTRAL BOARD of Direct Taxes (CBDT) has started displaying information on taxpayers' foreign assets and income on the Income Tax e-filing portal, in a move aimed at improving voluntary compliance.

The CBDT is showing foreign assets and income information received under the Automatic Exchange of Information (AEOI) framework, in the Annual Information Statement (AIS) of eligible taxpayers. Until now, this information was only available with the tax department.

This initiative has been undertaken to facilitate, and not to investigate, taxpayers in meeting their compliance obligations, government sources said.

India receives financial information of its resident taxpayers from over 100 partner jurisdictions under the various international agreements and mechanisms for exchange of financial account information that India has entered into.

The tax department every year receives AEOI information for the preceding calendar year starting from September of the ongoing year.

This information includes details of foreign bank accounts, custodial accounts, certain financial investments, interest, dividends and other specified financial income, as reported by the partner jurisdictions under internationally accepted standards of information exchange.

The CBDT is currently displaying information pertaining to 2022, 2023, and 2024 in the AIS. Information for 2025 will be displayed in the AIS once it is received in September or October, sources said.

CBDT aims to minimise inadvertent reporting errors, improve the accuracy of Income-tax Returns and make tax compliance simpler, more convenient and more transparent, sources said.

Govt identifies $51 bn in critical imports

NIKUNJ OHRI
& SHIVANGI ACHARYA
New Delhi, July 16

THE GOVERNMENT IS seeking to push domestic manufacturing for items worth $51 billion in imports as the country seeks to reduce reliance on overseas suppliers.

India imported $775 billion worth of goods in the 12 months ended March 2026 and an internal government analysis showed that imports worth $398 billion have the potential to be replaced by local manufacturing, according to government sources.

Of this, about $51 billion in imports were viewed as critical for the manufacture of items ranging from textiles to solar panels.

India's latest push to boost domestic production comes as it grapples with supply-chain risks heightened by geopolitical tensions. It is also seeking to reduce its dependence on China and narrow its trade deficit.

The items span sectors from footwear to textiles, electric vehicles and solar panels, one of the sources said.

"The identification is based on the fact that these are critical for economic resilience, cutting reliance on suppliers such as China, and to achieve cost competitiveness through incentives and subsidies," another government source said.

We must sell tourist experiences, not just destinations: Minister

SUGANDHA MUKHERJEE
New Delhi, July 16

INDIA SHOULD POSITION itself as an experience-led destination rather than merely a place of monuments, Union Tourism Minister Gajendra Singh Shekhawat said on Thursday, urging policymakers and industry to view tourism as a civilisational asset capable of driving jobs, investment and the country's global identity.

His remarks come as the World Travel & Tourism Council (WTTC) projects India's travel and tourism sector to continue outpacing the broader economy.

According to the WTTC's 2026 Economic Impact Research, the sector is expected to grow 8.5% this year, faster than the country's projected GDP growth of 6.4%, contributing $286.1 billion to the economy and supporting 48.1 million jobs. Domestic tourism is expected to remain the main growth driver, with domestic visitor spending estimated at $218 billion, accounting for nearly 85% of total tourism spending.

Speaking at the two-day Federation of Associations in Indian Tourism & Hospitality (FAITH) Conclave, Shekhawat said India's biggest competitive advantage lies in its living civilisation, diversity and cultural heritage.

"Unlike manufacturing or technology, India's competitive advantage lies in its living civilisation, diversity and cultural heritage. India has something that no manufacturing base or technology alone can create," he said.

"The challenge before us is no longer proving tourism's potential; it is harnessing it at scale," said FAITH Chairman Puneet Chhatwal. "Tourism is a growth engine with multiplier effects on economic and social development."

Over 1 bn people now under social protection

OVER 1 BILLION Indians are now covered under India's social protection system, up from 250 million in 2015, according to the International Labour Organization (ILO). At the end of 2025, around 940 million citizens were covered under social security protection.

The achievement was announced by the ILO's Director General Gilbert Houngbo on Wednesday in a video message to the 12th BRICS Labour and Employment Ministers' Meeting in Hyderabad. "According to ILO running estimates, India's social protection system now reaches 1 billion people. This milestone offers lessons that can be shared through South-South cooperation," Houngbo said.
