### Internal Risk Factors and Risks Relating to our Business

#### 1. We were subject to a search and seizure operation by the Department of Income Tax and may face proceedings for payment of additional taxes and/or penalties

We, Omaxe Infrastructure Limited, our Promoters and some of our employees were subject to a ‘search and seizure’ operation by the Department of Income Tax on September 22, 2005 under section 132 of the Income Tax Act, 1961 (“I.T. Act”). During these operations, certain books of accounts, records and cash amounting to Rs. 24.08 million were seized by the authorities. We have not received any demand for additional tax.

During the Fiscal 2007, the Company while filing return of income, included additional income of Rs. 48.70 million for the accounting year 2004-2005 and Rs. 47.4 million for the accounting year 2005-2006 as ‘other income’ and provided tax liability thereon of Rs. 41.93 million.

Subsequent to that, in response to the notice received from the income tax authorities, the Company has filed Block assessment returns under section 158 BC of the Act for the accounting years 1999-2000 to 2005-2006. The Company has on May 31, 2007, filed an application for settlement of cases under section 245 C(1) of the Act (which is pending admission) offering further additional income of Rs. 182.5 million for the accounting years 1999-2000 to 2005-2006. The Company has made provision for tax liability of Rs. 90.41 million (including interest) towards this additional income.

The above proceedings are currently underway and when concluded, could result in additional income tax, interest, penalties, etc. The outcome of the said proceedings, including the status of application pending with the settlement commission and the actual impact on the financial statements in addition to the taxes already provided are currently unascertainable and in the opinion of the management are not likely to be material. Hence no adjustment has been made in these financial statements for such impact, if any.

The accounting of the income, expense, assets and liabilities, if required, arising out of the aforesaid disclosure of additional income will be made on the completion of the said proceedings. These financial statements therefore do not reflect the accounting effect, other than the provision for income tax liability, arising out of the disclosure of additional income.

However, we cannot assure you that the outcome of the search and seizure operations and the survey will not materially and adversely affect our financial position or results of operations. For further details of the above please refer to ‘Notices’ under ‘Tax Cases’ of the section titled “Outstanding Litigation and Material Developments” on page 403.

#### 2. Fluctuations in market conditions may affect our ability to sell our projects at expected prices, which could adversely affect our revenues and earnings.

We are subject to significant fluctuations in the market value of land and inventories. The risk of owning undeveloped land, developed land and inventories can be substantial as the market value of land and inventories can change significantly as a result of changing economic and market conditions. There is a lag between the time we acquire land or development rights to the land and the time that we develop and sell our projects. Since our real estate investments are relatively illiquid, our ability to mitigate the risk of any market fluctuations is limited. We could be adversely affected if the market conditions deteriorate or if we purchase land or inventories at higher prices during stronger economic periods and the value of the land or the inventories subsequently decline during weaker economic periods.

## OMAXE LIMITED

Historically, the Indian real estate market has been cyclical, a phenomenon that can affect the optimal timing for both the acquisition of sites and the sale or rental of our properties. We cannot assure you that real estate market cyclicity will not continue to affect the Indian real estate market in the future. As a result, we may experience fluctuations in property values and rental income over time which in turn may adversely affect our business, financial condition and results of operations.

### 3. We may not be able to develop all of our land reserves.

We have extensive land reserves. As of March 31, 2007, these land reserves amounted to approximately 3,255 acres. Details of these land reserves are set forth in the table below:

2) Land owned by the subsidiaries of Omaxe on freehold basis, through which Omaxe has sole development rights.

- 3) Land owned by the Group Companies, Promoter Group & Associate Companies, Associates over which Omaxe has sole development rights under arrangement with such Companies and associates. The commercial effect of development right is to substantially entitle Omaxe to all the revenues from such development.
- 4) Out of the total, 193.64 acres of leasehold land (Govt. allotment) having leasehold rights in perpetuity or for a period of 90/ 99 years, the land admeasuring 110.35 acres is in the name of Omaxe and the balance land admeasuring 83.29 acres is in the name of subsidiaries of Omaxe.
- 5) Out of the total 193.64 acres of leasehold land, lease deeds for land admeasuring 47.8 acres allotted to Omaxe by State Industrial Development Corporation of Uttaranchal Limited (SIDCUL) in Pantnagar (Uttaranchal) and land measuring 37.02 acres allotted to Omaxe by New Okhla Industrial Development Authority (NOIDA) in U.P. are yet to be executed by the respective authorities. Further as on March 31, 2007 a letter of acceptance dated February 14, 2007 had been issued by the NOIDA in respect of land admeasuring 37.02 acres. Thereafter on April 18, 2007 a letter of allotment bearing no. NOIDA/Res. Plots/2007(1)/2007 has been issued by NOIDA, in favour of Omaxe.
- 6) Out of the total land in this category Omaxe has entered into a Joint Development Agreement with Patiala Development Authority (PDA), Patiala, Punjab to the extent of 336.5 acres and for the balance land of 129.23 acres, Omaxe has directly entered into Collaboration Agreement/ MOU with the respective land owners for development/ construction of their land.
- 7) Of these, approximately 39% comprises land for which we have not yet obtained a certificate for change of land use. For details, see “Risk Factors – We require certain regulatory approvals in the ordinary course of our business, and the failure to obtain them in a timely manner or at all may adversely affect our operations” on page xxi and other risk factors.

**4. Limited supply of land, increasing competition and applicable regulations are likely to result in land price escalation and a further shortage of developable land.**

Due to increased demand for land for development of residential and commercial properties, we are experiencing increasing competition in acquiring land in various geographies where we operate or propose to operate. In addition, the unavailability or shortage of suitable parcels of land for development leads to an escalation in land prices. Any such escalation in the price of developable land could materially and adversely affect our business, prospects, financial condition and results of operations.

Additionally, the availability of land, its use and development, is subject to regulations by various governmental authorities. For example, if a specific parcel of land has been marked as agricultural land, no commercial or residential development is permitted without the prior approval of the governmental authorities. For further details, see “Government and Other Approvals” on page 420.

Some parcels of land, in 21 of our current projects, which have been acquired by us or by individuals and corporate entities on our behalf, are currently marked as land on which development is not permitted, in part or whole, without the prior permission of the relevant governmental authorities. Our land reserves include approximately 1,283 acres of land on which development is currently not permitted as the change of land use certificates for the conversion of agricultural land to land eligible for real estate development are either pending before the relevant government authorities or have not yet been applied for.

If we do not receive the requisite permissions in a timely manner or in a manner acceptable to us, or at all, we may not be able to develop these properties. This could adversely affect our business, prospects, financial condition and results of operations.

**5. We have a limited operating history and our future performance is uncertain.**

While we started business as a construction and contracting company in 1989, we have limited operating history as a real estate development company. As a result, there is limited historical financial and operating information available to help you evaluate our past performance as a real estate development company or to make a decision about an investment in our equity shares. In addition, because of our limited operating history, our historical financial results may not accurately predict our future performance. Because of our narrow business focus, our financial results are more sensitive to changes and downturns within our industry than companies

## OMAXE LIMITED

---

with more diversified lines of business. For example, as a result of industry factors or factors specific to us, we may have to alter our anticipated methods of conducting our business, such as the nature, amount and types of risks we assume.

### **6. We recognise revenue based on “Percentage of Completion Method” of accounting on the basis of our management’s estimates of the project cost. Our revenues may fluctuate significantly from period to period.**

Pursuant to the issuance of guidance note on ‘recognition of revenue by real estate developers’, issued by the Council of Institute of Chartered Accountants of India, we recognize revenue generated from our projects on the “Percentage of Completion Method” of accounting. Under this method, revenue is recognized, in relation to areas sold by us, on the basis of the percentage of the actual cost incurred thereon including cost incurred for the purchase of land compared to the total estimated cost of the project. However, revenue is recognized only if the actual cost already incurred on the date of the financial statements is at least 30% of the total cost of the project, as estimated by the management. The estimates of saleable area and costs may be revised periodically by the management. We cannot assure you that these estimates will match the actual cost incurred in respect of these projects. The effect of such changes to estimates is recognized in the financial statements of the period in which such changes are determined. Therefore, our revenue recognition is based on the number of projects under execution during a period that qualify for such revenue recognition. This may lead to significant fluctuations in our revenues from period to period. Amounts received from customers for projects which either do not qualify for revenue recognition under this method or such amounts as are paid by customers in surplus of the amounts recognized under the method described above, are accounted for as advances from customers.

In the event of any change in law or Indian GAAP which requires a change in the method of revenue recognition, the financial results of our operations may be adversely affected. For the details of the method of revenue recognition, see the section titled “Management’s Discussion and Analysis of Financial Conditions and Results of operations — Critical Accounting Policies” on page 386.

### **7. Our business is subject to extensive government regulation.**

Acquisition of land and development rights in relation to immovable properties are governed by a multitude of statutory and governmental regulations including laws and regulations related to zoning, permitted land uses, proportion and use of open spaces, building designs, fire safety standards, height of the buildings, access to water and other utilities and water and waste disposal. In addition, we are subject to various central and state environmental laws and regulations. These regulations deal with the various aspects of the real estate development process and stipulate the requirements and procedure involved, including the requirement of transaction documents, payment of stamp duty, registration of property documents, purchase of property for the benefit of others and limitation on land acquisition by an individual entity. Also, our subcontractors and we are subject to laws and regulations relating to, among other things, environmental approvals in respect of the project, minimum wages, working hours, health and safety of labourers and requirements of registration for contract labour. In some of our markets, we are required to give commitments to provide certain infrastructure such as roads and sewage systems, which may require us to comply with certain additional regulations. Some approvals are required to be obtained after commencement of construction in relation to the project. For more information, see the section titled “Government and Other Approvals” on page 420.

Although we believe that our projects are in material compliance with such laws and regulations we cannot assure you that we will not be subjected to any such regulatory action in the future, including penalties, seizure of land and other civil or criminal proceedings. Even though we have been able to obtain the necessary approvals in the past, we cannot assure you that we will be able to obtain approvals in relation to our existing projects, or our new projects, at such times or in such form as we may require, or at all. Further, there may be changes to such laws and regulations resulting in increased costs to our operations and we may not be able to pass on these costs to our customers. Any such development may have an adverse affect on our financial condition and operations.

The laws and regulations under which we and our subcontractors operate, and our and their obligations to comply with them, may result in delays in construction and development, cause us to incur substantial compliance and other increased costs, and prohibit or severely restrict our real estate and construction businesses. If we are unable to continue to acquire, construct and develop land and deliver products as a result of these restrictions

or if our compliance costs increase substantially, our revenues and earnings may be reduced and we may not be able to sustain our current level of growth. For more information, see the section titled “Government and Other Approvals” on page 420.

As a property owning company, we are subject to the property tax regime in each state where our properties are located. These taxes could increase in the future, and new types of property taxes may be introduced which could increase our overall development and maintenance costs. We also buy and sell properties; property conveyances are generally subject to stamp duty. If these duties increase, the cost of acquiring properties will rise, and sale values could also be affected. Additionally, if stamp duties were to be levied on instruments evidencing transactions which we believe are currently not subject to such duties, such as the grant or transfer of development rights, our acquisition costs and sale values could be affected, resulting in a reduction of our profitability. Any such changes in the incidence or rates of property taxes or stamp duties could have an adverse affect on our financial condition and results of operations.

#### **8. We face uncertainty of title to our lands and may continue to do so in the future.**

The difficulty of obtaining title guarantees in India means that title records provide only for presumptive rather than guaranteed title. A portion of our existing land reserves and planned land acquisitions consist of agricultural lands for development purposes. The title to these lands is often fragmented and the land may, in many cases, have multiple owners. Some of our lands may have irregularities of title, such as non-execution or non-registration of conveyance deeds in respect of 84.82 acres, or 2.60%, of our land reserves, litigation affecting title in respect of 69.07 acres, or 2.12% of our land reserves, mutation certificates not being obtained on land admeasuring 108.58 acres, or 3.33% of the land reserves, encumbrances that we may not be aware of and further duties payable on the land reserve. Additionally, in some of our projects that are executed through joint ventures and collaboration with third parties, the title to the land may be owned by our joint venture partners, and we cannot assure you that these persons or entities have clear title to such lands.

We enter into agreements to acquire land in the normal course of our business. Prior to entering into any agreements to acquire land, we review appropriate land and revenue records and verify mutation details with the assistance of a local lawyer or consultant. We also verify the status of the encumbrance, charge or mortgage on the property and make due enquiries and take representations from the seller in respect of whether the property is under partition or under litigation. We also make enquiries from the relevant local authorities regarding any notification issued or pending in respect of the properties. For further details of the due diligence process conducted by us, refer to the section titled “Our Business” on page 55. While we endeavour to conduct due diligence and assessment exercises through local lawyers who issue title opinions prior to acquiring land and undertaking projects, we may not be able to assess or identify all risks and liabilities associated with the land, such as faulty or disputed title, unregistered encumbrances or adverse possession rights. As a result, some of our lands do not have guaranteed title and title has not been independently verified.

Additionally, we face various practical difficulties in verifying the title of a prospective seller or lessor of property. Indian law, for example, recognizes the ability of persons to effectuate a valid mortgage on an unregistered basis by the physical delivery of original title documents to a lender. Adverse possession under Indian law also gives rise, upon 12 years’ occupation, to valid ownership rights as against all parties, including government entities that are landowners, without the requirement of registration of ownership rights by the adverse possessor. Furthermore, under Indian law, a married person retains property rights to land alienated by their spouse if such married person has not consented to such alienation, effectively requiring consent by each spouse to all land transfers in order for a transferee to receive good title. Indian law also recognizes the concept of a Hindu undivided family, whereby all family members, including minor children, jointly own land and must consent to its transfer, absent whose consent a land transfer may be challenged by a non-consenting family member. Our title to land may be defective as a result of a failure on our part, or on the part of a prior transferee, to obtain the consent of all such persons. As each transfer in a chain of title may be subject to these and other defects, our title and development rights over land may be subject to various defects of which we are not aware. For these reasons, title insurance is not readily available in India.

The uncertainty of title to land makes the acquisition process more complicated, may impede the transfer of title, expose us to legal disputes and adversely affect our land valuations. Legal disputes in respect of land title

can take several years and considerable expense to resolve if they become the subject of court proceedings. The failure to obtain good title to a particular plot of land may materially prejudice the success of a development for which that plot is a critical part, and may require us to write off expenditures in respect of the development. In addition, lands for which we have entered into agreements to acquire but have not yet acquired form a significant part of our growth strategy for the future and even though such agreements do not form part of our existing land reserves, failure to obtain good title to these lands could adversely impact our property valuations and prospects.

**9. Our growth requires additional capital, which may not be available on terms acceptable to us.**

The real estate development industry is capital intensive and requires significant expenditure for land acquisition, development and construction. As of March 31, 2007, we had outstanding borrowings from banks, mutual funds and financial institutions of Rs. 8337.94 million. We intend to pursue a strategy of continued investment in additional real estate projects. We anticipate that we will need to obtain additional financing as we expand our operations. We may not be successful in obtaining additional funds in a timely manner, on favourable terms or at all. In addition, the availability of borrowed funds for our business may be greatly reduced, and the lenders may require us to invest increased amounts of equity in a project in connection with both new loans and the extension of facilities under existing loans. If we do not have access to additional capital, we may be required to delay, scale back or abandon some or all of our acquisition plans or growth strategies or reduce capital expenditures and the size of our operations.

**10. We have experienced rapid growth in the last few years and may not be able to sustain our growth, which may adversely affect our results.**

Our total income have grown from Rs. 1,455.56 million in Fiscal 2003 to Rs. 14,396.79 million in Fiscal 2007, at a CAGR of 77.34% and our profit after tax and minority interest increased from Rs. 47.67 million in Fiscal 2003 to Rs. 2,572.61 million in Fiscal 2007, at a CAGR of 171.04%. The year over year change in our total income over its immediately preceding year has been Rs. 6,198.17 million (75.60%), Rs. 4,232.63 million (106.72%), Rs. 1,128.74 million (39.78%) and Rs. 1,381.69 million (94.92)% for Fiscal 2007, 2006, 2005 and 2004, respectively. The year over year change in our net profit after tax and minority interest over its immediately preceding year has been Rs. 1,384.46 million (116.52%), Rs. 1,137.79 million (2259.31%), Rs. (33.12 million) (-39.67%) and Rs. 35.81 million (75.12%) for Fiscal 2007, 2006, 2005 and 2004, respectively.

For further details refer to the section titled "Management's Discussion of Financial Condition and Results of Operations" on page 382. We may not, however, be able to sustain our growth effectively or to maintain a similar rate of growth in the future, and the failure to do so may have a material adverse effect on our financial condition and results of operations.

**11. We take advantage of certain tax benefits under the provisions of the I. T Act, which if withdrawn, may adversely affect our financial condition and results of operations.**

The provisions of section 80-IB of the I.T Act provides for exemption on payment of income tax on housing projects approved before March 31, 2007 and where the construction of such projects is completed within four years from the end of the financial year during which such project is approved by the relevant government authorities. However, to benefit from this, certain specified conditions must be met including the requirement that the area of each dwelling unit is not more than 1,000 square feet within the radius of 25 kilometers of the municipal limits of metropolitan cities of New Delhi and Mumbai and 1,500 square feet in the rest of India. In the event these benefits are no longer available to us due to any change in law or a change in the nature of our projects in which case we may no longer be eligible to avail the benefits of section 80-IB of the Income Tax Act, the effective tax rates payable by us may increase and consequently our financial conditions may be adversely affected.

Our provision for taxation was 20.18%, 19.01%, 80.90%, 51.59% and 39.47% of our profit before tax in Fiscal 2007, 2006, 2005, 2004 and 2003, respectively. Tax benefits have also been extended to the development of SEZs provided the project meets certain specified conditions. We cannot determine the period of time for which these benefits will be available and the extent of these benefits. We may therefore be required to make provisions for payment of taxes depending on the availability of such tax benefits and this may have an impact on our

financial condition. For details of the said provisions of the Income Tax Act, see the section titled “Statement of Tax Benefits” on page 43.

**12. We may not be successful in identifying suitable projects, which may impede our growth.**

Our ability to identify suitable projects is dependent on a number of factors that may be beyond our control. These factors include the availability of suitable land, the willingness of landowners to sell us land on attractive terms, the ability to obtain an agreement to sell from all the owners where land has multiple owners, the availability and cost of financing, encumbrances on targeted land, government directives on land use, and the obtaining of permits and approvals for land acquisition and development. The failure to acquire targeted land may cause us to modify, delay or abandon entire projects, which in turn could cause our business to suffer. Further, developments which are contingent on receiving allocations of land by government authorities are subject to the risk of changes in government policies or failure by the relevant authority to acquire sufficient land, which may not allow us to complete the relevant project as planned, or at all.

In addition, land acquisition in India has historically been subject to regulatory restrictions on foreign investment. These restrictions are gradually being relaxed and this, combined with the aggressive growth strategies and financing plans of real estate development companies as well as real estate investment funds in the country, is likely to make suitable land increasingly expensive. If we are unable to compete effectively in the acquisition of suitable land, our business and prospects could be adversely affected.

**13. Our inability to acquire contiguous parcels of land may affect our future development activities.**

We acquire parcels of land and development rights over parcels of land in various locations from various landholders, over a period of time, for future development. These parcels of land are subsequently consolidated to form a contiguous landmass, upon which we undertake development. In the past, we have not experienced difficulties in acquiring such parcels of land and consolidating them. However, we may not be able to acquire such parcels of land, at all or on terms that are acceptable to us, which may affect our ability to consolidate parcels of land into a contiguous mass. Failure to acquire such parcels of land may cause delay or force us to abandon or modify the development of the land at a location, which in turn may result in a failure to realize our investment for acquiring such parcels of land. Accordingly, our inability to acquire contiguous parcels of land may adversely affect our business, financial condition, results of operations and prospects.

**14. We conduct due diligence and assessment exercises prior to acquisition of land for undertaking development, but we may not be able to assess or identify certain risks and liabilities.**

We constantly acquire lands for our various development activities and these may be acquired either through our Company or through third parties or entities identified by us for this purpose.

We have entered into agreements with 15 third parties for approximately 571 acres constituting 17.55% of our land reserves for acquisition of lands through such third parties. One or more of the following restrictive covenants, appear in the agreements entered into between our Company and third parties (including individuals):

- All gold, silver, oil, minerals, precious stones, fossils, coins, articles of value or antiquity, and structures and other relics or remains, or things of geological or archaeological interest discovered on the project land shall be the property of the other party. The Company has to take reasonable precautions to prevent its contractors and personnel (including the contractor’s) from removing or damaging any such article or thing.
- The Company has the responsibility of providing employment to a certain pre-determined number of people in core sectors for a specified time period.
- The Company will not mortgage, lien or create a charge on the project land.
- On obtaining the requisite approvals and sanctions from the authorities, the parties cannot terminate or rescind the agreement.
- No third party right may be created without the prior approval of the other party.
- Construction of the structures and other facilities by the Company has to be in accordance with the prescribed norms and the applicable bye-laws.

## OMAXE LIMITED

---

- The Company would not be allowed to book the area as per plan of building and to accept any money from public unless certain specified milestones are fulfilled. Further, permission and authority granted by the other party does not empower the Company to commence construction until plans are sanctioned by the appropriate authority.
- The parties to the agreement will not assign, transfer, charge or encumber the agreement in any manner or their rights and benefits under this agreement to any person without the prior written consent of the other party.
- The Company will be responsible solely for any mishap/, financial or any other liabilities occurring due to any defect in the development and construction of the project.
- The agreements contain defined time periods for completion of the project failing which the agreement may be terminated. Extensions may be granted in very exceptional circumstances, with penalty interest being imposed on the Company.
- The Company will indemnify the other party for all losses and delays on its part.
- The Company will be solely responsible for any accident that may occur during the course of construction and it shall be liable under the Workmen Compensation Act or under any other law/regulation in force. The Company will also indemnify the other party from liability arising out of accident during the course of construction.
- The Company may mortgage the property with the prior approval of the other party for raising loan from a government - recognized financial institution.

In addition, the following agreements contain certain other material restrictive covenants:

The joint development agreement dated November 16, 2006 with the Patiala Urban Planning and Development Authority ("PUDA") contains the following specific restrictive covenants:

- (i) Pricing of sale of units shall be at the discretion of the Company, where sale is not by auction. However PUDA shall hold the pre-emptive right with respect to sale consideration in case the same seems below the market price.
- (ii) During the sale procedure, reservations in allotment to certain categories like army, ex-servicemen of certain government organizations, and handicapped, as provided for by applicable laws, must be adhered to. The Company has to give preference to IT and biotech professionals in the allotment of residential plots.
- (iii) Disposal of IT, biotech and institutional area pricing will be the responsibility of the Company or its contractors subject to the pre-emptive right of PUDA. No sale shall be conducted or confirmed without approval from PUDA. PUDA shall have the right to monitor prices fixed by the Company for these units and may change the price or may cancel any sale and take over the sale procedure for those units and find prospective buyers willing to satisfy the requisite terms and conditions.
- (iv) The Company has to ensure that the terms of any third party agreements, which it may enter into, are in conformity with the terms and conditions of the agreement with PUDA. All third party agreements are to include a clause that in the event of a conflict between the third party agreement and the agreement with PUDA, the latter will prevail.
  - The collaboration agreement dated November 12, 2003 between Sushila Devi and others provides that any change in the constitution of the existing board of directors or shareholders of the Company will constitute an assignment or transfer of rights and benefits under the agreement.
  - The lease deed dated May 27, 2003 executed with the Greater Noida Industrial Development Authority ("GNIDA") provides that GNIDA reserves the right to make such decisions/, additions/, alterations or modifications in the terms and conditions of allotment/ or lease from time to time, as may be considered just and expedient by GNIDA.

We have an internal assessment process on land selection and acquisition which includes a due diligence exercise to assess the title of the land and preparation of feasibility reports to assess its development and

marketability. The details of the due diligence process conducted by us is disclosed in the section titled “Our Business” on page 55. Our internal assessment process is based on information that is available or accessible by us. There can be no assurance that such information is accurate, complete or current. Any decision based on inaccurate, incomplete or dated information may result in risks and liabilities associated with acquiring and owning such parcels of land, being passed onto us. This may adversely affect our business, financial condition and results of operations.

**15. Our growth strategy to expand into new geographic areas poses risks.**

We may face significant competition from other real estate developers, such as DLF Limited, Ansal Properties & Infrastructure Limited and Unitech Limited, many of which undertake similar projects within the same regional markets as us. Given the fragmented nature of the real estate development business, we may not have adequate information about the projects our competitors are developing and accordingly, we may run the risk of underestimating supply in the market. Our business strategy is to expand across India. We may face the risk that our competitors may be better known in other markets, enjoy better relationships with landowners and international joint venture partners, gain early access to information regarding attractive parcels of land and be better placed to acquire such land. Increasing competition could result in price and supply volatility, which could cause our business to suffer. In addition, we are also in the process of embarking on new businesses, in which we may not have the required amount of experience and therefore we may not be able to compete effectively with established and new competitors in these businesses. Our expansion into new geographies and undertaking of new projects also exposes us to additional risks associated with such diversification arising due to low level of familiarity with the development, ownership and management of properties in the new geographies, or if we undertake a project of different size or style than those currently being developed, including adjusting our construction methods to different geographies; obtaining the necessary construction materials and labor in sufficient amounts, numbers and on acceptable terms; obtaining necessary governmental approvals and the building permits under unfamiliar regulatory regimes; attracting potential customers in a market in which we do not have significant experience; and cost of hiring new employees and increased infrastructure costs.

**16. Our revenues and profits are difficult to predict and can vary significantly from period to period.**

Sales revenues are dependent on various factors such as the size of our developments and the extent to which they qualify for percentage of completion treatment under our revenue recognition policies and general market conditions. In addition, the anticipated completion dates for our projects, including those set forth in this Prospectus, are estimates based on current expectations and could change significantly, thereby affecting our timing of sales. The combination of these factors may result in significant variations in our revenues and profits. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indicative of our future performance.

**17. The success of our real estate development business is dependent on our ability to anticipate and respond to consumer requirements.**

We depend on our ability to understand the preferences of our customers and accordingly develop projects that suit their tastes and preferences. As customers continue to seek better housing and better amenities as part of their residential needs, we are required to continue our focus on the development of quality-centric residential accommodation with various amenities. The growth and success of our commercial business depends on the provision of high quality office space to attract and retain clients who are willing and able to pay rent or purchase prices at suitable levels, and on our ability to anticipate the future needs and expansion plans of these clients. Similarly, the success of our retail business depends on our ability to recognise and respond to the changing trends in India’s retail sector and to draw consumers away from traditional shopping environments such as small local retail stores or markets as well as from competing malls. Therefore our ability to anticipate and understand the demands of the prospective customers is critical to the success of our real estate development business. The growth of the Indian economy has led to changes in the way businesses operate in India and the growing disposable income of India’s middle and upper income classes has led to a change in lifestyle, resulting in a substantial change in the nature of their demands. Our inability to provide these customers their preference or our failure to anticipate and respond to customer needs accordingly will affect our business and prospects. This could also lead to loss of potential customers to our competitors who may offer better facilities.

### **18. We undertake projects jointly with third parties, which entail certain risks.**

We enter into joint venture or collaboration with third parties, including with our Promoter group companies in some of our projects. In most of these projects, the details of which are given below, the title to the land is owned by one or more of these third parties and we acquire development rights on the land. However, we are required to pay advances, the details of which are given below, to the owners of the land for such development rights. We cannot assure you that these lands are validly held under law by the persons with whom we enter into development or collaboration agreements with. In the event that we are not able to complete the construction and development of these lands, we may not be able to recover the advances that have been made by us.

Most of such development and collaboration agreements confer rights on us to construct, develop market and sell the built-up area to buyers. Often such development and collaboration agreements do not convey any interest in the immovable property (the land or the building) to us. In addition, such projects involve working together with several third parties and our relationships are governed by such collaboration or development agreements. Though we are generally empowered to make all operating decisions for development of these projects, we are required to make certain decisions in consultation with such parties. These may limit our flexibility to make decisions (including those pertaining to development and marketing) in relation to such projects.

Investments through joint ventures may, under certain circumstances, involve certain risks including the possibility of joint venture partners failing to meet their financial obligations on time or at all. Joint venture partners may have business interests or goals that are inconsistent with our business interests or goals. Such investments may also run the potential risk of impasses on certain key decisions. Any disputes that may arise between us and our joint venture partners may cause delay in completion, suspension or complete abandonment of the project. In addition, we may in certain circumstances be liable for the actions of our joint venture partners or parties with whom we have business collaborations.

As of March 31, 2007, we had 15 projects which have been undertaken jointly with third parties other than Promoters, Promoter group entities or associates.

As of March 31, 2007, we had paid Rs. 638.50 million to third parties as advance towards the cost of acquiring development rights.

The restrictive clauses in development agreements with third parties are stated in risk factor no. 14.

### **19. We rely on various contractors or third parties in developing our projects.**

Most of our projects require the services of contractors and various other parties including architects, engineers, and suppliers of labour and materials for our projects. The timing and quality of construction of the projects we develop depends on the availability and skill of these parties, as well as contingencies affecting them, including labour and raw material shortages and industrial action such as strikes and lockouts. We cannot assure you that skilled third parties or contractors will continue to be available at reasonable rates or at all and in the areas in which we conduct our projects. As a result, we may be required to make additional investments or provide additional services to ensure the adequate performance and delivery of contracted services and any delay in project execution could adversely affect our profitability. Additionally, we rely on manufacturers and other suppliers and do not have direct control over the quality of the products they supply, which may adversely affect the construction quality of our developments. In addition, if such contractors or third parties do not complete on our orders timely or satisfactorily, our reputation and financial condition could be adversely affected. As we expand geographically, we will have to use contractors with whom we are not familiar, which will increase the risk of cost overruns, construction defects and failures to meet scheduled completion dates.

### **20. We are subject to penalty clauses under the agreements entered into with our customers, for any delay in the completion of the project.**

The agreements that we enter into with certain of our customers require us to complete these constructions on time and may provide for penalty clauses wherein we are liable to pay penalty to the customers for any delay in the completion of the project. While, we have included these penalty clauses in our existing agreements voluntarily, inclusion of these penalty clauses in such agreements may become mandatory in the future. We cannot assure you that we will always finish the construction or development of our projects in accordance with the timelines

specified in such agreements. Any inability of ours to complete these constructions in a timely manner could adversely affect our business, financial condition and results of operations.

**21. We do not have intellectual property rights over our name “Omaxe”**

Our Chairman and Managing Director, Mr. Rohtas Goel has registered trademarks over the name “Omaxe”. We have the license to use the trademarks pursuant to a license agreement dated October 1, 2005. Under the license agreement, we initially had to pay a lump sum amount of Rs. 12 million to Mr. Goel and agreed to pay a royalty fee at the rate of 2% of our real estate turnover for every fiscal year. An amount of Rs. 132 million was paid as royalty including initial lump sum amount for the year 2005-2006. However, commencing Fiscal 2007, Mr. Rohtas Goel, exercising his rights of renunciation, has agreed to receive the fixed payment of Rs. 1 million per annum as royalty. The fee payable to Mr. Goel is reflected in the related party transactions in the section titled “Financial Statements — Related Party Transactions” on page 294 of the Prospectus. Accordingly, we do not enjoy the statutory protections accorded to a registered trademark and are subject to the risk of non-performance under this agreement or other contractual risks. Further, the license agreement expires on March 31, 2008. We cannot assure you that our license to use these trademarks will be extended or that we may be able to enjoy these trademarks after this date. For details on the license agreement, see the section titled “Material Contracts and Documents for Inspection” on page 532.

**22. We are subject to restrictive covenants in certain debt facilities provided to us by our lenders.**

There are certain restrictive covenants in the agreements we have entered into with certain banks and financial institutions for secured loans. These restrictive covenants require us to obtain either the prior permission of such banks or financial institutions or require us to inform them of various activities, including, among others, alteration of our capital structure, raising of fresh capital or debt, payment of dividend, ability to sell or transfer the secured property, undertaking new projects or undertaking any merger, amalgamation, restructuring or change in management and further permit the concerned lenders to seek early repayments of, or recall the said loans or enhance the interest rates applicable thereto. Some of these agreements provide that our lender has the absolute right to change the terms and conditions of the agreement (including interest rate, payment schedule) and the decision of the lender is final and binding on us. Although we have received consent from our lenders for this Issue, these restrictive covenants may affect some of the rights of our shareholders, including receiving dividends. Any additional financing that we require to fund our capital expenditures, if met by way of additional debt financing, may place restrictions on us which may, among other things, increase our vulnerability to general adverse economic and industry conditions; limit our ability to pursue our growth plans; require us to dedicate a substantial portion of our cash flow from operations to make payments on our debt, thereby reducing the availability of our cash flow to fund capital expenditures, meet working capital requirements and use for other general corporate purposes; and limit our flexibility in planning for, or reacting to changes in our business and our industry, either through the imposition of restrictive financial or operational covenants or otherwise. Certain lenders under some of these financing arrangements are also entitled to appoint additional nominee directors on our Board of Directors. Additionally, some of our Promoters have given personal guarantees as collateral security for amounts borrowed due under some of these financing agreements. We cannot assure you that Promoters will pay or be able to pay under such collateral security in the event that they are required to do so. For further information, see the section titled “Financial Indebtedness” on page 75.

**23. We require certain regulatory approvals in the ordinary course of our business, and the failure to obtain them in a timely manner or at all may adversely affect our operations.**

We require statutory and regulatory approvals and permits for us to execute our projects, and applications need to be made at appropriate stages for such approvals. Some of our projects are in the preliminary stages of planning and development and we are yet to apply for obtain approvals in respect of the same, including for the conversion of land use. Further, we intend to construct hotels, IT Parks and SEZs on some of the commercial land over which we have development rights. Our definitive building and layout plans in relation to these intended projects are yet to be finalized and approved. We cannot assure you that we will receive these approvals on time, at all or in accordance with our current plans. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time frames anticipated by us or at all. Any delay or failure to obtain the required permits or approvals in accordance with our current plans may impede the execution of our business plans and projects.

## OMAXE LIMITED

---

In connection with our business, we have applied for, or are in the process of applying for, such approvals or their renewal. We may not receive such approvals or renewals in the time frames anticipated by us or at all, which could adversely affect our business. For more information, see the section titled “Government and Other Approvals” on page 420.

**24. We may not have the required registrations under the Contract Labour (Regulation and Abolition) Act, 1970 (“CLRA”) and other applicable labour legislations.**

Currently, we do not have registrations under the CLRA or other applicable labour legislations for some of our projects. We may be subject to penalties, prosecutions or other consequences for our failure to register under these labour legislations. Upon registration under these labour legislations, we will be required to comply with certain labour welfare measures including contributing towards statutory labour welfare funds which may impose an additional financial burden on us. For more information, see the section titled “Government and Other Approvals” on page 420.

**25. Our success depends in large part upon our senior management, directors and key personnel and our ability to retain them and attract new key personnel when necessary.**

Our senior management and key personnel collectively have many years of experience with us and would be difficult to replace. We do not maintain “key man” insurance for our senior managers or other key personnel, other than the policy that we have maintained for our Chairman and Managing Director, Mr. Rohtas Goel, our Joint Managing Director, Mr. Sunil Goel, and our Director, Mr. J.B. Goel. We cannot assure you that we will be able to retain any or all of the key members of our management. The loss of the services of such key members of our management team could have an adverse effect on our business and the results of our operations.

Further, our ability to maintain our position in the real estate development sector depends on our ability to attract, train, motivate, and retain highly skilled personnel. In the event we are unable to do so, it could have an adverse effect on our business and results of operations.

**26. Work stoppages and other labour problems could adversely affect our business.**

We operate in a labour-intensive industry and hire casual labour in relation to specific projects. If we are unable to negotiate with the workmen or the contractors, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. In addition, we may not be able to procure required casual labour for our existing or future projects. These factors could adversely affect our business, financial position, results of operations and cash flows. Moreover, if our employees unionize we may be subject to industrial unrest, slowdowns and increased wage costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and our business may be adversely affected.

**27. We will be controlled by our Promoters and Promoter group so long as they control a majority of our Equity Shares.**

After the completion of the Issue, our Promoters and Promoter group will control, directly or indirectly, around 89.70% (or 88.80 % if the Green Shoe Option is exercised) of our outstanding Equity Shares. As a result, our Promoters and Promoter group will have the ability to exercise significant control over us and all matters requiring shareholder approval, including election of directors, our business strategy and policies and approval of significant corporate transactions such as mergers and business combinations. The extent of their shareholding in us may also have the effect of delaying, preventing or deterring a change in control of our company, even if such a transaction may be beneficial to our other shareholders. The interests of our Promoters and Promoter group as our controlling shareholder could also conflict with our interest or the interests of our other shareholders. We cannot assure you that our Promoters and Promoter group will act to resolve any conflicts of interest in our favour.

**28. Grant of stock options under our proposed Employee Stock Option Plan will result in a change to our profit and loss account and will to that extent reduce our profits.**

We have adopted an ESOP under which eligible employees and directors of the Company are able to participate subject to such approvals as may be necessary. Pursuant to the ESOP, 500,000 stock options have been granted to Mr Arvind Parakh, CEO – Corporate Strategy and Finance at an exercise price of Rs. 150 which may be significantly lower than the Issue Price.

Under Indian GAAP, the grant of these stock options has resulted in a charge to our profit and loss account due to amortization of expenses of Rs 0.94 million for the year ended 2007 and shall be an aggregate expense of Rs.7.50 million over the vesting period of the stock options.

In the Finance Act, 2007, the Government of India has extended fringe benefit tax (“FBT”) to the stock options issued under an ESOP. The value of fringe benefits shall be the fair market value of the ESOPs on the date on which the option vests with the employee as reduced by the amount actually paid by, or recovered from, the employee in respect of the ESOPs. The proposed FBT, if applicable, may increase our tax costs.

**29. We have entered into, and will continue to enter into, related party transactions.**

We have entered into transactions with several related parties, including our Promoters and Directors. For more information regarding our related party transactions, see the disclosure on related party transactions contained in our consolidated restated financial statements included in this Prospectus see the section titled “Financial Statements — Related Party Transactions” on page 294.

**30. We are involved in certain legal and other proceedings in India and may face certain liabilities as a result.**

We are involved in legal proceedings and claims in India in relation to certain civil matters. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. Should any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements, which could increase our expenses and our current liabilities. Further, we may also not be able to quantify all the claims in which we or any of our group companies are involved. We cannot assure you that these legal proceedings will be decided in our favour. Any adverse decision may have a significant effect on our business and results of operations. There can be no assurance that the provisions we have made for litigation will be sufficient or that further substantial litigation will not be brought against us in the future. Our failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business, prospects, financial condition and results of operations could be adversely affected. For more information regarding these legal proceedings, see the section titled “Outstanding Litigation and Material Developments” on page 403.

### 31. Environmental problems could adversely affect our projects.

We are required to conduct an environmental assessment for most of our projects before receiving regulatory approval for these projects. These environmental assessments may reveal material environmental problems, which could result in our not obtaining the required approvals. Additionally, if environmental problems are discovered during or after the development of a project, we may incur substantial liabilities relating to cleanup and other remedial measures and the value of the relevant properties could be adversely affected.

### 32. Our insurance coverage may not be adequate.

Our real estate projects could suffer physical damage from fire or other causes, resulting in losses, including loss of rent, which may not be fully compensated by insurance. In addition, there are certain types of losses, such as those due to earthquakes, floods, hurricanes, terrorism or acts of war, which may be uninsurable, are not insurable at a reasonable premium or which may exceed our insurance limits. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all material losses. Further, we may not have obtained insurance cover for some of our projects that do not require us to maintain insurance. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, that is not covered by insurance or exceeds our insurance coverage, the loss would have to be borne by us and our results of operations and financial performance could be adversely affected. The proceeds of any insurance claim may be insufficient to cover rebuilding costs as a result of inflation, changes in building regulations, environmental issues as well as other factors. Should an uninsured loss or a loss in excess of insured limits occur, we would lose the capital invested in and the anticipated revenue from the affected property. We would also remain liable for any debt or other financial obligation related to that property. We cannot assure you that material losses in excess of insurance proceeds will not occur in the future.

Further, we do not carry coverage for title defects, contractors' liability, timely project completions, loss of rent or profit, construction defects or consequential damages for a tenant's loss profits. Any damage suffered by us in respect of these uninsured events would not be covered by insurance and we would bear the impact of such losses.

**33. We have had negative operating cash flows in recent Fiscals.**

We have had negative operating cash flows in recent Fiscals. There can be no assurance that we will not have negative cash flows in the current Fiscals or in the future.

**34. Our contingent liabilities could adversely affect our financial condition.**

As of March 31, 2007, we had contingent liabilities of Rs. 1,434.23 million as disclosed in our restated consolidated financial statements in the section titled "Management Discussion and Analysis of Financial Condition and Results of Operations" on page 382. There can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current Fiscal or in the future.

**35. Any failure in our IT systems could adversely impact our business.**

Any disruption of the functioning of our IT systems could disrupt our ability to track record and analyse the work in progress, cause loss of data and disruption in operations, including an ability to assess the progress of the projects, process financial information or manage creditors/debtors or engage in normal business activities. This could have an adverse effect on our business.

**36. We have not entered into any definitive agreements to use a substantial portion of the net proceeds of the Issue and we have not identified lands some of the lands proposed to be acquired with the net proceeds of the Issue.**

The deployment of funds as described in the section titled "Objects of the Issue" on page 33 is at the discretion of our Board of Directors. Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. Further, such estimates were based on market conditions and management expectations as of the date they were made. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. For example, the significant rise in cement costs over the last year could result in an escalation of our project cost estimates. Significant revisions to our funding requirements or the deployment of Issue proceeds may result in the rescheduling of our project expenditure programs and an increase or decrease in our proposed expenditure for a particular project. We have not entered into any definitive agreements to utilize the net proceeds of the Issue. As described in the section titled "Objects of the Issue" on page 33, we intend to use a part of the net proceeds of the Issue to acquire lands. We have not identified all the lands that we propose to so acquire.

**37. Our Promoters may have a conflict of interest as some of our Promoter group companies are in the same line of business.**

Some of our Promoter group companies are in the same line of business as we are and our Promoters may favour the interest of our Promoter group companies over our Company. Our Promoters also hold key managerial roles in most of these Promoter group companies which may require their time and efforts. Therefore our Promoters may not be able to devote their full time and attention on their managerial duties in relation to our Company. In addition, there may be a conflict of interest between the business of our Promoter group companies and our business. For further information on Promoter group companies, please refer to "Our Promoters and Promoter group" on page 134.

**38. Some of our Promoter group companies and companies in which we have investments have incurred losses.**

Some of our Promoter group companies and companies in which we have investments have incurred losses within the last three Fiscals. For details of these losses, please refer to the section titled "Our Promoters and

**39. Our statements regarding areas under development and saleable area are based on management estimates.**

The acreage and square footage data presented in this Prospectus is based on management estimates and have not been independently appraised. The acreage and square footage actually developed may differ from the numbers presented herein, based on various factors such as market conditions, title defects and any inability to obtain required regulatory approvals. The saleable area presented for our projects are based on management's understanding of what constitutes the saleable area in any project. The definition of saleable area may change on the basis of government regulation and this may therefore adversely affect the revenues that we generate from our projects.

**40. We have not obtained any third party appraisals for our projects.**

We have not obtained any third party appraisals in connection with our acquisition of properties or development rights and undertaking projects. The terms of the transaction agreements and the valuation methods used to determine the value of the properties are determined by our senior management team. Our estimates for the projects may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or relocate our project expenditure and may have an adverse impact on our business, financial condition and results of operations. In addition, the estimates of the costs of projects for which we propose to use the net proceeds of the Issue have not been appraised by any third party and are based on internal estimates only.

**41. Some of our agreements with third parties in relation to the purchase of land have expired or may be invalid.**

As part of our land acquisition process, we enter into agreements or MOU with third parties prior to the transfer or conveyance of title of the land. We enter into these agreements or MOU to ensure that the sellers of the land satisfy certain conditions within the stipulated time frame specified under these agreements. Under the agreement, the owners of the land may be required to provide all of the original deeds and documents in relation to the land. Upon entering into these agreements, we are required to pay these landowners, certain advances towards the land. These agreements also provide that the lands must be conveyed in our favour within a prescribed period of time.

In the event that we are not able to acquire these lands, all or part of the advance monies paid by us to these third parties, may not be recovered by us. Further, in the event that these agreements are either invalid or have expired, we may lose the right to acquire these lands and also may not be able to recover the advances made in relation to the land. Any indecisiveness on our part or by third parties to perform the obligations or any delay in performing the obligations under these agreements may lead to our inability to acquire these lands as the agreements may also expire. Any failure to renew these agreements on similar terms or recover the advance monies from the relevant counterparties could adversely affect our business, financial condition and results of operations.

**42. Our plans to develop SEZs are subject to a number of contingencies and may not be successful.**

Our success in the development of SEZs will depend on our ability to attract manufacturing or industrial units that conduct business within the SEZs as well as the continued availability of Fiscal incentives under the SEZ regime. Since the SEZ regime has been in force for a relatively short time, the relevant regulations may be subject to inconsistent interpretation and, thus, there may be instances of divergent opinions among local, state, national and judicial authorities as to their application. The SEZ regime has attracted public interest litigation in Indian courts, including the Supreme Court of India. As a result, aspects of the SEZ regime are currently under review by the GoI and approvals of proposed SEZs have been temporarily suspended. The uncertainty as to the future of the SEZ regime and as to the application and evolution of relevant regulations as well as the possibility of withdrawal of applicable benefits and concessions and the current suspensions of approvals of proposed SEZs create risks to our current and planned investments in SEZ developments.

**43. Our plans to develop hotels are subject to a number of contingencies and may not be successful.**

We intend to use our existing real estate development capabilities to build and own hotels. Our hotels at Amritsar, Greater Noida and Patiala are part of commercial malls, which are under construction. We have applied for change of land use for our hotel project in Faridabad.

Our success in the development of hotels will depend on our ability to forecast and respond to demand in an industry in which we have no experience to date. The success of this business is also subject to our ability to select appropriate locations and joint venture partners or management companies to operate the hotels profitably.

**44. There are qualifications in our joint auditors' report.**

**I. Qualifications affecting Statement of Consolidated Restated Assets and Liabilities or Statement of Consolidated Restated Profit and Loss Account**

**1. In respect of the Company**

- i. The Statutory Auditors of the Company; Doogar and Associates, Chartered Accountants and RSM & Co., Chartered Accountants for the year ended March 31, 2007, have included qualifications in their Auditors Report on the accounts. This is reproduced below:

*We draw attention to notes 7 and 8 to schedule 23, which elaborate the events arising out of the search under section 132 of the Income Tax Act 1961 conducted by the income tax authorities during the previous year. The Company has disclosed additional income of Rs. 96.10 mio in the return of income filed for accounting years 2004-2005 and 2005-2006 and Rs. 182.50 mio for the accounting years 1999-2000 to 2005-2006 in the application filed with the settlement commission pending admittance. iii. **Sukhversa Properties Private Limited**

- In our opinion and according to the information and explanations given to us, the company is regular in depositing undisputed statutory dues relating to Income Tax *except for delays in some cases*. Other statutory dues including Provident Fund, Investor Education and Protection Fund, Employees State Insurance, Sales Tax, Wealth Tax, Service Tax, Custom Duty, Excise Duty, Cess are not applicable to the company.

Although we and our subsidiary have taken and will be taking steps to address such qualifications, we cannot assure that there will be no audit qualifications in the auditors' reports for subsequent fiscal years.

Effective internal controls and audit system are necessary for us to provide reliable financial reports. If we cannot provide reliable financial reports, our business and operating results could be harmed. As we continue to grow, we will continue to improve our internal controls and audit system. Any failure to implement and maintain the improvements in our internal controls and audit system, or difficulties encountered in the implementation of these improvements in our controls, could cause us to fail to meet our reporting obligations. Such failure may result in negative perceptions of our business among our customers, suppliers, investors and others, which may have a material adverse impact on our business.

**45. Our business is concentrated only in few states of India.**

Currently, our projects are focused in 30 cities in 9 states in northern and central India. We would, therefore, be directly affected by factors that may impact the demand and supply of real estate projects in these states. These may include the political climate, government policies, industrial action, demographic trends and other factors that may lead to an economic slowdown in these states and affect our profitability and financial conditions.

**46. We have not identified all of the lands proposed to be acquired with the net proceeds of the Issue.**

As described in the section titled "Objects of the Issue" on page 33, we intend to use Rs. 2,360.31 million to acquire lands for new projects. We have not identified all of the lands that we propose to so acquire.

**47. We own only 17.87% of our reported land reserves.**

Our Company owns 581.65 acres, or 17.87 %, of 3254.8 acres that comprise our land reserves as of March 31, 2007. For details on the land reserves which we own, are subject to agreements to purchase, development rights agreements and memoranda of understanding, see "– We may not be able to develop all of our land reserves" appearing in the section titled "Risk Factors" on page xi.

**External risk factors**

**1. Our business is heavily dependent on the performance of the real estate market and the availability of real estate financing in India.**

Our business is heavily dependent on the performance of the real estate market in India, particularly in the regions in which we operate, and could be adversely affected if market conditions deteriorate. Real estate projects take a substantial amount of time to develop, and we could incur losses if we purchase land at high prices and we have to sell our developed projects during weaker economic periods. Further, the real estate market, both for land and developed properties is relatively illiquid, in that there may be high transaction costs as well as little or insufficient demand for land or developed properties at the expected rental or sale price, as the case may be, which may limit our ability to respond promptly to market events. The real estate market is significantly affected by changes in government policies, economic conditions, demographic trends, employment and income levels and interest rates, among other factors. These factors can negatively affect the demand for and valuation of our projects under development and our planned projects.

Lower interest rates on financing from India's retail banks and housing finance companies, particularly for residential real estate, and favourable tax treatment of loans, have helped fuel the recent growth of the Indian real estate market. However, interest rates in India are exhibiting a rising trend, which could discourage consumers from borrowing to finance real estate purchases and depress the real estate market.

Additionally, stricter provisioning and risk weightage norms imposed by the RBI in relation to real estate loans by banks and housing finance companies could reduce the attractiveness of property or developer financing, and the RBI or the Gov may take further measures designed to reduce or having the effect of reducing credit to the real estate sector. If the demand for, or supply of, real estate financing at attractive rates were to diminish or cease to exist, our business and financial results could be adversely affected.

**2. The government may exercise rights of compulsory purchase or eminent domain in respect of our lands.**

Like other real estate development companies in India, we are subject to the risk that governmental agencies in India may exercise rights of eminent domain, or compulsory purchase in respect of lands. The Land Acquisition Act, 1894 allows the central and state governments to exercise rights of compulsory purchase, or eminent domain,

which, if used in respect of our land, could require us to relinquish land with compensation. The likelihood of such actions may increase as the central and state governments seek to acquire land for the development of infrastructure projects such as roads, airports and railways. Any such action in respect of one or more of our major current or proposed developments could materially and adversely affect our business. A portion of our land in Sonapat and Kundli that forms part of our land reserves has been subject to land acquisition by the Govt and proceedings relating thereto are currently pending before the High Powered Committee, Government of Haryana. For further details, please refer to the section titled "Outstanding Litigations and Material Developments" at page 403.

**3. Significant increases in prices or shortage of building materials could harm our results of operations and financial condition.**

Our business is affected by the availability; cost and quality of cement, steel and construction equipment we need to construct and develop our properties. Our principal raw materials include steel, cement, wood and aluminum. The prices and supply of these and other raw materials depend on factors not under our control, including general economic conditions, competition, production levels, transportation costs and import duties. If, for any reason, our primary suppliers of raw materials should curtail or discontinue their delivery of such materials to us in the quantities we need and at prices that are competitive, our ability to meet our material requirements for our projects could be impaired, our construction schedules could be disrupted, and we may not be able to complete our projects as per schedule. We may also not be able to pass on any increase in the prices of these building materials to our customers. This could affect our results of operations and impact our financial condition.

**4. Restrictions on foreign direct investment in the real estate sector may hamper our ability to raise additional capital.**

Pursuant to the notification issued by the Government of India titled Press Note No. 2 (2005 series), FDI of up to 100% is permitted without prior regulatory approval in townships, housing, built-up infrastructure and construction and development projects, subject to certain restrictions as specified in Press Note 2 and subsequent related clarifications and notifications as issued from time to time, if any. The key restrictions are:

- a. Minimum area to be developed under each project would be as set forth below:
  - I. for the development of serviced housing plots, a minimum land area of 10 hectares.
  - II. for construction-development projects, a minimum built-up area of 50,000 sq. meters.
  - III. for a combination project, any one of the above two conditions would be sufficient.
- b. The FDI investment would further be subject to the following conditions:
  - I. Minimum capitalization of US\$10 million for wholly-owned subsidiaries and US\$ 5 million for joint ventures with Indian partners. The funds would have to be brought in within six months of the commencement of business of the Company.
  - II. Original investment cannot be repatriated before a period of three years from the completion of minimum capitalization. However, investors may be permitted to exit earlier with the prior approval of the Government through the FIPB.

Our inability to raise additional capital as a result of these and other restrictions could adversely affect our business and prospects. For more information on these restrictions, see the section titled "Regulations and Policies in India" on page 89.

**5. Our business is susceptible to adverse developments in the regions in which we operate.**

Our operations and assets are located in northern India which is prone to high seismic activity and are at risk of suffering significant damage should an earthquake occur. While our business has not been materially affected by earthquakes in the past, it is possible that future earthquakes, cyclones, floods or other natural disasters, particularly those that directly affect the areas in which our developments and other operations are located, could result in substantial damage to our properties and adversely affect our operations and financial results. Our business may also be adversely affected by regulatory developments such as land use regulations, zoning laws, taxes and environmental regulations, as well as political and social developments that discourage customers from investing or operating in real estate in those areas.

**6. Our ability to sell our products will be affected by the availability of financing to potential customers, especially buyers of residential properties.**

A large number of our customers, especially buyers of residential properties finance their purchases through third party mortgage financing. The interest rate has substantially reduced in the last 3 years. As a result, the amount of housing loans disbursed in India has been increasing consistently. Availing of home loans for residential properties has become particularly attractive due to income tax benefits and high disposable income. In the event, there is a change in the policy of the government and such income tax benefits are withdrawn or the interest rates on such loans are increased or there is decrease in the availability of home loans, availing of home loans may be reduced which may adversely affect our operating results and financial condition.

**7. The industry in which we operate is competitive, highly fragmented, with low entry barriers resulting in increased competition that may adversely affect our results.**

The industry in which we operate is highly fragmented. Less or low fixed capital requirements have led to low entry barriers resulting in a large number of players in the industry. Moreover, due to the lesser requirements of technical expertise in the housing and real estate sector as opposed to the industrial/infrastructure construction sector, the housing and real estate sector has a larger number of new entrants and existing players from whom we face competition. These new and existing players undertake projects similar to ours in the same regional markets in which our projects are located. Our inability to compete successfully in our industry with the new entrants or the existing players may materially affect our business prospects and financial condition.

We compete for land, sale of projects with other private developers. Some of our competitors such as DLF Limited, Ansal Properties & Infrastructure Limited and Unitech Limited may have greater resources (including financial, land resources, and other types of infrastructure) to take advantage of efficiencies created by size, and access to capital at lower costs, have a brand recall and relationships with homeowners. Our success in the future will depend significantly on our ability to maintain and increase market share in the face of such competition. Our inability to compete successfully with the existing players in the industry, may affect our business prospects and financial condition.

**Risks Relating to India and investment in Equity Shares**

**1. A slowdown in economic growth in India could cause our business to suffer.**

Our performance and growth are dependent on the health of the Indian economy. The economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalisation policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any slowdown in the Indian economy may adversely impact our business and financial performance and the price of our Equity Shares.

**2. Significant shortages in the supply of crude oil or natural gas could adversely affect the Indian economy, which could adversely affect us.**

India imports approximately 75% of its requirements of crude oil. Crude oil prices are volatile and are subject to a number of factors such as the level of global production and political factors such as war and other conflicts, particularly in the Middle East, where a substantial proportion of the world's oil and natural gas reserves are located. Global crude oil prices have risen significantly in 2005 and 2006, driven in part by the strong demand for imported oil in India and China. Any significant increase in oil prices could affect the Indian economy, including the real estate sector. This could adversely affect our business including our ability to grow, our financial performance, our ability to implement our strategy and the price of our Equity Shares.

**3. Political instability or changes in the government could delay the liberalization of the Indian economy and adversely affect economic conditions in India generally, which could impact our financial results and prospects.**

Since 1991, successive Indian governments have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector. Nevertheless, the role of the Indian central and state governments in the Indian economy as producers, consumers and regulators has remained significant. The leadership of India has changed many times since 1996. The current central government, which came to power in May 2004, is headed by the Indian National Congress and is a coalition of several political parties. Although the current government has announced policies and taken initiatives that support the economic liberalization policies that have been pursued by previous governments, the rate of economic liberalization could change, and specific laws and policies affecting real estate, foreign investment and other matters affecting investment in our securities could change as well.

**4. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.**

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, make travel and other services more difficult and ultimately adversely affect our business.

## OMAXE LIMITED

---

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

**5. Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.**

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of below normal rainfall or other natural calamities could have a negative impact on the Indian economy, adversely affecting our business and the price of our Equity Shares.

**6. After this Issue, our Equity Shares may experience price and volume fluctuations or an active trading market for our Equity Shares may not develop.**

The price of the Equity Shares may fluctuate after this Issue as a result of several factors, including volatility in the Indian and global securities markets, the results of our operations, the performance of our competitors, developments in the Indian real estate sector and changing perceptions in the market about investments in the Indian real estate sector, adverse media reports on us or the Indian real estate sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India's economic liberalisation and deregulation policies, and significant developments in India's fiscal regulations.

There has been no recent public market for the Equity Shares prior to this Issue and an active trading market for the Equity Shares may not develop or be sustained after this Issue. Further, the price at which the Equity Shares are initially traded may not correspond to the Issue Price.

**7. Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.**

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

**8. Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.**

The Indian securities markets are smaller than securities markets in more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. These exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected.

**9. Any downgrading of India's debt rating by an independent agency may harm our ability to raise debt financing.**

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our capital expenditure plans, business and financial performance.

You should carefully consider the information set forth under "Risk Factors" in this Prospectus. In this Prospectus, all references to "Omaxe Limited", "Omaxe", "we", "us", "our", "the Company" and "our Company" refer to Omaxe Limited and its subsidiaries, unless the context otherwise requires or where otherwise indicated.*

We are a real estate development and construction company with operations in 30 cities and 9 states in India. We are involved in residential and commercial real estate development projects ranging from integrated townships, group housing and retail and other commercial properties, hotels, information technology and bio-tech parks to special economic zones. Our operations span across all aspects of real estate development, from the identification and acquisition of land, to the planning, execution and marketing of our projects.

We commenced business in 1989 as a construction and contracting company, and as of March 31, 2007, we have completed more than 120 construction projects in such capacity. In 2001, we diversified into the real estate development business with a focus on residential and commercial properties. As of March 31, 2007 we have completed eight residential projects, consisting of seven group housing and one integrated township project, and two commercial projects, including retail and office space, covering approximately 5.13 million sq. ft of built-up / developed area. We have diversified our project portfolio by undertaking projects for the development of hotels, information technology and bio-tech parks.

As of March 31, 2007, we had access to land reserves of approximately 3,255 acres (including approximately 571 acres of land belonging to joint ventures and collaborations in respect of which our Economic Interest is approximately 74% calculated on a weighted average basis in relation to such land), of which approximately 3,096 acres (including approximately 451 acres of land belonging to our joint ventures and collaborations) relate to projects that are currently under development or under various stages of approval for development, representing approximately 150 million sq. ft. of saleable area, and approximately 159 acres (including approximately 120 acres belonging to our joint ventures and collaborations) relate to our future projects and projects that are currently in various phases of planning.

As of March 31, 2007, we had 52 current residential and commercial projects consisting of 21 group housing projects, 16 integrated townships, 14 shopping malls and commercial complexes and 1 hotel. Our 'current projects' include 38 projects which are under development and 14 which are under various stages of approvals for development. We expect to commence development on these 14 projects within Fiscal 2008. The 16 integrated townships are essentially 'mixed use' townships consisting of residential and commercial projects and are expected to include 10 group housing projects, 16 commercial projects, one bio-tech park and one information technology park. We are also developing projects in the hospitality sector. Our hotels at Amritsar, Greater Noida and Patiala are part of commercial malls, which are under construction. We have applied for change of land use for our hotel project in Faridabad.

With the development of the Indian economy and the resulting increase in corporate and consumer incomes, as well as foreign investment, we see significant opportunities for growth in the real estate business.

Our Total Income have grown from Rs. 1,455.56 million in Fiscal 2003 to Rs. 14,396.79 million in Fiscal 2007, at a CAGR of 77.34% and our profit after tax and minority interest increased from Rs. 47.67 million in Fiscal 2003 to Rs. 2,572.61 million in Fiscal 2007, at a CAGR of 171.04%. The year over year change in our total income over its immediately preceding year has been Rs. 6,198.17 million (75.60%), Rs. 4,232.63 million (106.72%), Rs. 1,128.74 million (39.78%) and Rs. 1,381.69 million (94.92)% for Fiscal 2007, 2006, 2005 and 2004, respectively. The year over year change in our net profit after tax and minority interest over its immediately preceding year has been Rs. 1,384.46 million (116.52%), Rs. 1,137.79 million (2259.31%), Rs. (33.12 million) (-39.67%) and Rs. 35.81 million (75.12%) for Fiscal 2007, 2006, 2005 and 2004, respectively.

We were one of the first construction companies in northern India to receive an ISO 9001:2000 certification.

Our Promoter and founder, Mr. Rohtas Goel, has more than 20 years of experience in the construction and real estate business. After the completion of this Issue, our Promoters and Promoter group is expected to continue to own 89.70% of our Equity Shares (assuming the Green Shoe Option is not exercised) or 88.80% of our Equity Shares (assuming the Green Shoe Option is exercised in full).

The saleable area presented for our projects are management estimates based on our current plans that have either been approved or are under various phases of approval. The saleable area actually developed may differ from these estimates based on various factors such as market conditions, title defects, inability to obtain regulatory approvals or changes in government regulations. See "Risk Factors — Internal Risk Factors and Risks Relating to Our Business — xi. Our statements regarding areas under development and saleable area are based on management estimates".

### STRENGTHS

We believe that the following are our principal competitive strengths:

#### ***Extensive land reserves***

We recognize that extensive land reserves are the most important resource for a real estate developer. As of March 31, 2007, we had access to land reserves of approximately 3,255 acres (including approximately 571 acres of land belonging to joint ventures and collaborations in respect of which our Economic Interest is approximately 74% calculated on a weighted average basis in relation to such land), of which approximately 3,096 acres (including approximately 451 acres of land belonging to our joint ventures and collaborations) relate to projects that are currently under development or under various stages of approval for development, representing approximately 150 million sq. ft. of saleable area, and approximately 159 acres (including approximately 120 acres belonging to our joint ventures and collaborations) relate to our future projects and projects that are currently in various phases of planning.

#### ***Ability to identify, acquire and consolidate land***

One of our key strengths is our ability to identify suitable tracts of land for our developments and to acquire and consolidate such land. We have an in-house 'project research and land identification' team consisting of 23 employees who are involved in gathering relevant market data, assessing the potential of a location after evaluating its demographic trends and in identifying relevant government schemes and incentives. On the basis of such data, our in-house 'project research and land identification team' identifies suitable tracts of land in such cities and towns for our projects. We also have a team of 28 employees who interact with the owners of the land and co-ordinate the purchase of the lands for our developments from the landowners.

#### ***Experience in the construction industry with a track record for quality of construction and for timely delivery of projects***

We have been in the construction and contracting business for 18 years and have a high level of technical expertise in executing our projects and as of March 31, 2007 we had completed more than 120 construction projects in such capacity. Our experience in the construction business has also given us the ability to plan and execute our projects in a timely manner. We understand the intricacies of project planning and dealing with execution related issues like raw material procurement, labour, suppliers and other third parties. We have a team of civil engineers, architects and others who are professionally qualified and experienced in their respective fields and are able to monitor the execution and implementation of our projects.

#### ***An established brand image and consumer confidence***

We have developed a reputation for delivering quality projects in a timely manner. Our experience in the construction business and our recent real estate projects have created awareness among consumers about the Omaxe brand. As of March 31, 2007 the total number of units that we have sold and/or booked to our customers consist of more than 19,000 residential and 2,000 commercial property units. We were one of the first construction companies in northern India to receive an ISO 9001:2000 certification. We have established 'Omaxe Care', a dedicated 24/7 helpline for our customers. We were one of the first real estate developers to provide this service, which is a one-point interface with our customers in relation to any of their specific requirements, queries or grievances.

#### ***Ability to identify emerging trends in customer requirements and strong marketing network***

We believe our ability to identify emerging trends in customer requirements and developing projects to suit such requirements is our strength. Our marketing and sales team is our interface to potential customers and clients. This interface provides us an insight into the customer requirement trends in terms of type, location and price of the product and guides us to plan our promotional activities. In addition, we have a strong marketing network of more than 800 business associates. Our marketing is structured considering the nature of the project and the customer base at which the project is targeted. Our sustained and structured marketing over the cycle of the project results in wide exposure of our products to the target audience. We believe that the presence of well known brands in our large retail outlets ensures confidence among potential customers.

#### ***We have a diversified business within the real estate sector***

Our real estate business has diversified across geographical locations and in different real estate projects that we are involved in. We have projects and land reserves in 30 cities and 9 states in India, and as of March 31, 2007, we had 52 current residential and commercial projects consisting of 21 group housing projects, 16 integrated townships, 14 shopping malls and commercial complexes and 1 hotel. Our 'current projects' include 38 projects which are under development and 14 which are under various stages of approvals for development. We expect to commence development on these 14 projects within Fiscal 2008. We are also developing hotels at Amritsar, Greater Noida and Patiala as part of commercial malls, which are under construction. We have applied for change of land use for our hotel project in Faridabad.

### ***Emphasis on innovation***

We believe that innovation is the key to be a successful real estate development company in India. We were one of the first developers to conceptualize and develop theme malls in northern India. Some of our theme based projects are:

- **Wedding Malls:** Wedding malls are meant to be 'one-stop shops' for all wedding related arrangements and will include shops and outlets selling wedding wear, jewellery, floral decorations and other wedding related accessories. They will also include food courts, multiplexes and banquet halls. We are currently developing 'Wedding Mall, Gurgaon', 'Wedding Mall, Agra' and 'Wedding Mall, Patiala'.
- **'House 2 Home'** will include shops selling interior design-ware, furniture and other residential accessories to set-up and furnish a home. We are currently developing a 'House 2 Home' mall at Gurgaon.
- **'NRI City'** in Greater Noida, is a mini-township in NCR and provides a choice of residential housing from apartments to individual plots with world-class amenities.
- **'The Nile'** at Gurgaon is a residential project incorporating Egyptian style architecture but with modern amenities and conveniences.
- **'The Forest-Noida'** is one of the first ultra-luxury apartments being developed in northern India. We are also currently developing a similar ultra-luxury apartment project near Suraj Kund at Faridabad, Haryana.
- We constantly upgrade the design and architectural variety that we can offer to our customers.

### ***Experienced and professional management***

We have a team of professionals, many of whom have over 25 years of experience in their respective fields. Our founder, Mr. Rohtas Goel has more than 20 years of experience in the construction and real estate business. We provide our staff with a corporate environment that encourages responsibility, autonomy and innovation. We believe that the experience of our management team and its in-depth understanding of the real estate market in India will enable us to continue to take advantage of both current and future market opportunities.

### **STRATEGY**

Our strategy is to be a leading real estate development company with the highest standards of professionalism, ethics and customer service and to thereby contribute to and benefit from the growth of the Indian economy. The key elements of our business strategy are as follows:

#### ***Expanding into new locations across India and focus on Tier 2 and Tier 3 cities***

In addition to focussing on Delhi, Mumbai, Noida, Gurgaon, Kolkotta, Chennai, Hyderabad and Bangalore ("Tier 1 Cities"), we also intend to focus on non-Tier 1 cities in India ("Tier 2 and Tier 3 Cities") where we believe significant growth prospects exist with increasing purchasing power for quality real estate projects at reasonable prices. We also believe that the costs of developing projects in Tier 2 and Tier 3 cities are lower than for Tier 1 Cities and hence we will be required to commit a lesser amount of capital to develop these projects. In Fiscal 2007 and Fiscal 2006, 62.21% and 83.23%, respectively, of our real estate revenues from sale of properties (excluding ancillary income) came from projects we undertook in Tier 2 and Tier 3 cities in India. Our focus on Tier 2 and Tier 3 cities and in identifying locations that provide fiscal incentives for real estate development has been instrumental in providing us the early mover advantage in these locations.

#### ***Continue to diversify the portfolio of our projects***

We intend to maintain a spread of the different types of residential and commercial projects we are involved in as this provides us with a strategy for growth as well as mitigating the risk of focussing on only one or two types of projects. Our strategy is to position ourselves to capitalize on the opportunities generated across the country for the types of projects that we develop and in various other sectors of the Indian economy. We constantly explore innovative strategies for marketing our projects, diversifying revenue streams and for enhancing the value of our brand. We propose to continue to acquire development rights over lands for implementation of our projects at opportune times.

Our goal is to build our residential real estate business across India. We plan to focus on the development of group housing projects for the mid income to higher income groups in key locations in India. As part of our growth strategy, we also plan to focus on the development of integrated townships in key locations in India. We also intend to take advantage of increasing urbanisation by investing in the development of integrated townships on the peripheries of cities around the country wherever we see opportunity.

## **OMAXE LIMITED**

### ***Outsourcing to increase the scale of operations***

We are focussed on concentrating on our core strength of real estate development and on proven track record in the construction industry. We outsource some critical activities like designing, architecture and construction to take advantage of the expertise of reputed companies, to reduce costs and to add value to our projects. We use the past experience of our team in construction and contracting business for monitoring and supervising the architectural and construction activities that we outsource. This allows us to increase the scale of our operations.

### ***Enter into joint ventures/collaborations and investment in innovation***

- We intend to enter into key arrangements with strategic partners to enhance our real estate development business and to be able to develop and deliver state of the art projects. We are also exploring arrangements with several other parties to be able to develop additional theme malls and other commercial complexes. We intend to enter into joint ventures and joint development agreements with relevant State development authorities to develop integrated townships. We have entered into a private-public participation agreement with the Patiala Urban Planning & Development Authority to develop an integrated township at Patiala over an area of 336.50 acres. We are committed to innovation in our projects. We were one of the first developers to conceptualize and develop theme malls in northern India and we are developing 'Wedding Mall, Gurgaon', 'Wedding Mall, Agra' and 'Wedding Mall, Patiala' and the 'House 2 Home' mall in Gurgaon.

Of the QIB Portion, 5% would be available for allocation to Mutual Funds. If at least 60% of the Net Issue cannot be allotted to QIBs, then the entire application money will be refunded herewith. Further, not less than 10% of the Net Issue shall be available for allocation on a proportionate basis to Non-Institutional Bidders and not less than 30% of the Net Issue shall be available for allocation on a proportionate basis to Retail Individual Bidders, subject to valid Bids being received at or above the Issue Price.

QIBs are not allowed to withdraw their Bid(s) after the Bid/Issue Closing Date. For further details please refer to the section titled "Terms of the Issue" on page 38 of this Prospectus.

Our Company shall comply with guidelines issued by SEBI for this Issue. In this regard, our Company has appointed DSP Merrill Lynch Limited, Citigroup Global Markets India Private Limited and UBS Securities India Private Limited as the Global Co-ordinators and Joint BRLMs, JM Financial Consultants Private Limited as Book Running Lead Manager and ICICI Securities Primary Dealership Limited as Co- Book Running Lead Manager to manage the Issue and to procure subscription to the Issue.

**Illustration of Book Building and Price Discovery Process** *(Investors may note that this illustration is solely for the purpose of easy understanding and is not specific to the Issue)*

Bidders can bid at any price within the price band. For instance, assuming a price band of Rs. 40 to Rs. 48 per share, issue size of 6,000 equity shares and receipt of nine bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the website of the BSE ([www.bseindia.com](http://www.bseindia.com)) and NSE ([www.nseindia.com](http://www.nseindia.com)). The illustrative book as shown below, shows the demand for the shares of the company at various prices and is collated from bids from various investors.

Number of equity shares bid for	Bid Price (Rs.)	Cumulative equity shares bid	Subscription
500	48	500	8.33%
700	47	1,200	20.00%
1,000	46	2,200	36.67%
400	45	2,600	43.33%
500	44	3,100	51.67%
200	43	3,300	55.00%
2,800	42	6,100	101.67%
800	41	6,900	115.00%
1,200	40	8,100	135.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired quantum of shares is the price at which the book cuts off i.e. Rs. 42 in the above example. The issuer, in consultation with the book running lead managers will finalize the issue price at or below such cut off price i.e. at or below Rs. 42. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in respective category.

The Green Shoe Option will be implemented in accordance with the SEBI Guidelines. Our shareholders at the extraordinary general meeting held on December 7, 2006 have authorized the Green Shoe Option.

DSP Merrill Lynch Limited has agreed to act as the Stabilizing Agent for the purposes of effectuating the Green Shoe Option, as envisaged under Chapter VIII A of the SEBI Guidelines. Guild Builders Private Limited, one of our Promoters has agreed to lend the Loaned Shares to the Stabilising Agent for the purposes of effectuating the Green Shoe Option.

The Stabilizing Agent shall be responsible for, among others things, price stabilization post listing, if required, as per SEBI Guidelines. If commenced, stabilizing will be conducted in accordance with applicable laws and regulations. ### 1) Stabilization Period

Stabilization Period shall mean the period commencing from the date of obtaining trading permission from the Stock Exchanges for the Equity Shares under the Issue, and ending 30 calendar days thereafter or when a number of shares equal to Over Allotment shares have been brought back by the Stabilizing Agent.

The primary objective of the Green Shoe Option is stabilization of the market price of Equity Shares after listing. Towards this end, after listing of Equity Shares, in case the market price of the Equity Shares falls below the Issue Price, then the Stabilizing Agent, at its discretion, shall determine the timing of purchasing Equity Shares, the quantity of Equity Shares to be bought and the price at which the Equity Shares are to be bought from the market with the objective of stabilization of the market price of the Equity Shares.

### 2) Decision regarding Exercise of Green Shoe Option

- (i) On the Pricing Date, the Global Co-ordinators, in consultation with the Company and the Stabilizing Agent, shall determine the number of Equity Shares to be over allotted which shall not exceed 9.83% of the Issue.
- (ii) In the event, that the Green Shoe Option is exercised, our Company in consultation with the Stabilizing Agent, shall make over allotment of Equity Shares as per the procedure detailed below.

### 3) Procedure for Over Allotment and Stabilization

- (ii) The monies received from the Bidders for Equity Shares in the Issue against the over allotment shall be kept in the GSO Bank Account distinct and separate from the Issue Account and shall be used only for the purpose of buying shares from the market during the Stabilization Period for the stabilization of the post listing price of the Equity Shares.
- (iii) Upon such allotment, the Stabilizing Agent shall transfer the Over Allotment Shares from the GSO Demat Account to the respective depository accounts of the successful Bidders.
- (iv) For the purpose of purchasing the Equity Shares, the Stabilizing Agent shall use the funds lying to the credit of GSO Bank Account.
- (v) The Stabilizing Agent shall determine the timing of buying the Equity Shares, the quantity to be bought and the price at which the Equity Shares are to be bought from the market for the purposes of stabilization of the post listing price of the Equity Shares.
- (vi) The Equity Shares purchased from the market by the Stabilizing Agent, if any, shall be credited to the GSO Demat Account and shall be returned to the Green Shoe Lender within two working days from the expiry of the Stabilization Period.

- (vii) On the expiry of the Stabilization Period, in the event the Equity Shares lying to the credit of the GSO Demat Account at the end of the Stabilization Period but before the transfer to the Green Shoe Lender is less than the Over Allotment Shares, upon being notified by the Stabilizing Agent, we shall within five days of the end of the Stabilization Period allot, new Equity Shares in dematerialized form for the number equal to such shortfall to the credit of the GSO Demat Account. The newly issued Equity Shares shall be returned by the Stabilizing Agent to the Green Shoe Lender in lieu of the Over Allotment Shares, within two working days of them being credited into the GSO Demat Account, time being of essence in this regard.
- (viii) Upon the return of Equity Shares to the Green Shoe Lender pursuant to and in accordance with sub-clauses (vi) and (vii) above, the Stabilizing Agent shall close the GSO Demat Account.

#### 4) GSO Bank Account

The Stabilizing Agent shall also submit a final report to SEBI in the format prescribed in Schedule XXIX of the SEBI Guidelines. This report shall be signed by the Stabilizing Agent and us, if required, and be accompanied by the depository statement for the GSO Demat Account for the Stabilization Period indicating the flow of shares into and from the GSO Demat Account. If applicable, the Stabilizing Agent shall, along with the report give an undertaking countersigned, if required by the respective depositories of the GSO Demat Account and the Lender regarding confirmation of lock-in on the Equity Shares returned to the Lender in lieu of the Over-Allotment Shares.

#### 6) Rights and Obligations of the Stabilizing Agent

The funds raised in the Issue, as set forth above, are expected to be utilized by March 2008. Post March 2008, cashflows from operations, advances received from customers and further fund raising may be used to fund any further requirements.

The fund requirements and deployment are based on current internal management estimates and have not been appraised by any bank or financial institution. These are based on current conditions and are subject to change in light of changes in external circumstances of costs, or in other financial condition, business or strategy, as discussed further below.

In case of variations in the actual utilization of funds earmarked for the purpose set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purpose for which funds are being raised in this Issue. If surplus funds are unavailable, we expect that the required financing will be through our cashflows from operations and debt.

In addition, the fund requirements are based on the current internal management estimates of our Company. We operate in a highly competitive, dynamic market condition, and may have to revise our estimates from time to time on account of new projects that we may pursue including any industry consolidation initiatives, such as potential acquisition opportunities. We may also reallocate expenditure to newer projects or those with earlier completion dates in the event of delays in our existing projects. Consequently, our fund requirements and deployment may also change accordingly. Any such change in our plans may require rescheduling our expenditure programs, starting projects which are not currently planned, discontinuing projects currently planned and an increase or decrease in the expenditure for a particular project or land acquisition in relation to current plans, at the discretion of the management of our Company. In case of any shortfall or cost overruns, we intend to meet our estimated expenditure from our cash flow from operations and debt.

### THE INDIAN ECONOMY

Over the last three years, India has experienced economic growth with the GDP growth being 8.5 %, 7.5% and 8.4%, respectively, for the Fiscals ended 31 March, 2004, 31 March, 2005 and 31 March, 2006 (Source: Reserve Bank of India - <https://reservebank.org.in/cdbmsi/servlet/login/>). Further, the Reserve Bank of India has projected a 7.5-8.0 % GDP growth for the Fiscal ending 31 March, 2007. Positive indicators include a stable annual growth rate of above 7.5% in the past three years and rising foreign exchange reserves of approximately US\$179.1 billion as of January 26, 2007 (Source: <https://reservebank.org.in>).

According to India's Central Statistical Organisation estimation as at March 31 2005, India has a population of 1,091 million people and is the world's largest democracy in terms of population. According to the World Bank, India was the twelfth largest economy in the world in the year ended March 31, 2005, with a GDP in nominal terms estimated to be US\$ 731 billion. (Source: [www.worldbank.org](http://www.worldbank.org)(World Bank, 2006)

The service sector has grown at a rapid pace in recent times. An important factor in the growth of the services sector has been the strong growth of the IT and ITES sectors. These sectors benefited from the growing international trend toward off shoring and the resultant demand for skilled, low cost, English speaking workers. Indian competitiveness in this area has been aided by substantial investment in telecommunications infrastructure and the phased liberalisation of the communications sector.

The charts below illustrate recent GDP growth and its components, as well as projected GDP growth in Fiscal 2006 and Fiscal 2007 (Asian Development Outlook (2006), Asian Development Bank):

With this growth, and the prospect of further growth in the Indian economy, transportation and information connectivity across the country and development of a supporting, scalable infrastructure have become increasingly important. Moreover, as the economy and business centres continue to develop in urban centres (particularly smaller urban centres), it is expected that India's overall population will become more urbanised, and the importance of transportation connectivity and infrastructure is expected to magnify.

Accordingly to the Transport Plan 2021 released by the NCR Planning Board of the GoI, Ministry of Urban Development, all the NCR towns would be connected with each other through peripheral expressways consisting of the Kundli-Manesar-Palwal ("KMP"), Western Peripheral Expressway, the Kundli-Ghaziabad-Palwal ("KGP"), Eastern Peripheral Expressway (Faridabad-NOIDA-Ghaziabad Corridor and Ghaziabad-Kundli Corridor). Such infrastructure initiatives are expected to provide faster connectivity and to result in further development of the NCR and adjoining region.

Further, nuclearisation of Indian families has accelerated the demand for mortgages and for new housing. This would result in additional residential units requirement over the next few years to meet housing demand. Rising income levels and greater job

creation, particularly in sectors such as business process outsourcing and insurance is also resulting in enhanced demand for quality housing. Further, housing mortgage rates have declined considerably over the last five years, making it easier for the expanding middle-class to buy homes. This decrease, coupled with aggressive marketing and innovative schemes, has created greater consumer desire for mortgage financing.

### THE REAL ESTATE SECTOR IN INDIA

Real Estate sector covers residential housing, commercial offices, trading spaces such as theatres, hotels and restaurants, retail outlets and industrial buildings such as factories and government buildings. Real estate involves the purchase, sale and development of land, residential and non-residential buildings. The activities of the real estate sector encompass the housing and construction sector also.

The real estate sector in India has assumed growing importance with the liberalization of the economy. The consequent increase in business opportunities and migration of the labour force to towns and cities has, in turn, increased the demand for commercial and housing space, especially rental housing. Developments in the real estate sector are being influenced by the developments in the retail, hospitality and entertainment (e.g. hotels, resorts, cinema theatres) industries, community services (e.g. hospitals, schools) and IT and ITES (e.g. call centers) etc. and vice versa as well as owing to the fact that quality real estate development prompts raising of standards of retail, hospitality etc.

Real estate is one of the major employment drivers in India. This is because of the chain of backward and forward linkages that the sector has with other sectors of the economy. About 250 ancillary industries such as cement, steel, brick, timber, building material etc. are dependent on the real estate industry. A unit increase in expenditure in this sector has a multiplier effect and the capacity to generate income as high as five times. Contribution of housing and real estate to India's GDP is market 1% against 3-6% of developing countries. If the economy grows at the rate of 10%, the housing sector has the capacity to grow at 14% and generate 3.2 million new jobs over the next 10 years. (Source: Integrated Databases India Limited <http://www.directories-today.com/estate.html>)

In the last 3 years, the construction activity in the real estate sector has been buoyant, after returning to normalcy in 2001 (Between 1995 and 1999, there was a severe recession). Rising demand from technology sectors, demographic shift (increasing disposable incomes and urbanisation), suburban developmental models and favourable government policies have changed the face of the real estate construction sector. The housing boom continued, despite a marginal firming up of the interest rate on housing loans. Over the next few years, too, rising residential demand, the continued demand from IT and ITES for commercial space, the rising retail demand percolating to urban and smaller cities and favourable policy in the form of FDI will drive the growth of the real estate construction industry. These three segments are expected to attract investments to the tune of Rs. 5,508 billion over the next 3 years as compared with Rs. 4,869 billion in the last 3 years.

As can be seen from the table below, CRIS INFAC anticipates cumulative investments to the tune of 8,288 million sq ft.

New growth concentrations — Tier II/III cities, and suburban and peripheral markets in established markets. The construction activity in residential, commercial and retail segments of real estate, which until recently was focused on the four metros, is spreading to Tier II and Tier III cities as well. Also, within the established markets, real estate activities are moving into suburban business districts from central districts to take advantage of lower real estate prices and higher availability of space, which provide built-to-suit larger centralised office space.

Historically, the real estate sector in India was unorganised and characterised by various factors that impeded organised dealing, such as the absence of a centralised title registry providing title guarantee, lack of uniformity in local laws and their application, non-availability of bank financing, high interest rates and transfer taxes, and the lack of transparency in transaction values. In recent years however, the real estate sector in India has exhibited a trend towards greater organisation and transparency, accompanied by various regulatory reforms. These reforms include:

Gov support for the repeal of the Urban Land Ceiling Act, with nine state governments having already repealed the Act; modifications in the Rent Control Act to provide greater protection to homeowners wishing to rent out their properties; rationalization of property taxes in a number of states; and the proposed computerisation of land records.

The trend towards greater organisation and transparency has contributed to the development of reliable indicators of value and the organised investment in the real estate sector by domestic and international financial institutions, and has also resulted in the greater availability of financing for real estate developers. Regulatory changes permitting foreign investment are expected to further increase investment in the Indian real estate sector. The nature of demand is also changing, with heightened consumer expectations that are influenced by higher disposable incomes, increased globalisation and the introduction of new real estate products and services.

These trends have benefited from the substantial recent growth in the Indian economy, which has stimulated demand for land and developed real estate across the business lines. Demand for residential, commercial and retail real estate is rising throughout India, accompanied by increased demand for hotel accommodation and improved infrastructure. Additionally, tax and other benefits applicable to SEZs are expected to result in a new source of real estate demand.

### **Industry Characteristics**

The real estate industry has the following characteristics:

*Capital Structure:* Construction activities are often funded by the client who may make cash advances at different stages of construction, especially in residential projects.

*Higher margin in commercial properties:* Generally, a commercial project yields higher operating profit margins than a residential project.

*Leasing is an option for commercial properties:* Unlike most residential properties (which are sold outright), commercial space is either leased or sold outright. Under the leasing option, the lease rentals received from tenants form a source of recurring cash flow for the developer. This apart, the property rights remains with the developer, enabling the property to be disposed of subsequently, if required.

*Contingent Liabilities:* Due to project based work, real estate companies often carry substantial contingent liabilities in the form of guarantees in order to comply with specific client requirements.

*Development Risks:* Profitability of each project is subject to risks of mis-pricing, adverse conditions, geological conditions, management of specification changes and the outcome of claims on competitions. As per AS-7 of the Indian accounting standards, construction companies are required to recognize all losses incurred and foreseeable in the respective accounting period.

*Credit Risk:* Real estate developers usually secure project advances from clients to keep them committed to the projects. Approvals required for real estate projects: A number of approvals are required for real estate projects from regulatory/statutory authorities. For further details, refer to the section titled "Government and Other Approvals" beginning on page 420 of this Prospectus.

### **Key Regulations**

The real estate industry has been among the most highly regulated sectors in India. Dubious land records, high transaction taxes and various real estate regulations have kept a large portion of property transactions out of the formal market. Urban Land Ceiling Repeal Act (ULCRA) and Rent Control Acts are largely responsible for the artificial scarcity of land, which has resulted in Mumbai and Delhi becoming two of the most expensive real estate markets in the world. Some of the other regulations that affect the growth in housing construction include, Coastal Regulatory Zone (CRZ) regulation, Mill Land Regulations and property taxes.

#### **ULCRA**

ULCRA was introduced as a social equity measure to curb profiteering and hoarding of urban land and prevent urban congestion. Urban cities were classified into A, B and C categories, and under the provisions of the Act, ceilings were imposed on the maximum permissible usage of land.

*Key provisions:*

- Imposition of a ceiling on the ownership and possession of vacant land in urban agglomerations, based on the classification of the urban agglomeration.
- Acquisition of excess vacant land by the state government, with powers to dispose it to serve the common good.

## OMAXE LIMITED

---

- Payment in cash and bonds for acquiring excess vacant land.
- Granting exceptions with respect to certain specific categories of vacant land.
- Regulating the transfer of vacant land within the ceiling limit.
- Regulating the transfer of urban or urbanisable land with any building (whether constructed before or after the commencement of the Act) for 10 years, from the commencement of the Act, or the construction of the building, whichever is later.
- Restricting the plinth area for the construction of future residential buildings.

### *Impact and consequences*

This Act failed to serve its purpose. For the total estimated 550,000 acres of vacant land in 64 cities across India, the government took only 47,550 acres under this Act. To ensure that their land is not acquired, many corporates sought recourse to certain sections of the Act. Consequently, land prices increased and supply shrank substantially. In order to release the remaining land and make it available for housing purposes, ULCRA was replaced by an Ordinance promulgated in 1999 after the state governments of Haryana and Punjab passed a resolution for the repeal of the Act. The Urban Land (Ceiling & Regulation) Repeal Act, 1999 (Repeal Act) subsequently replaced the ordinance. Initially, the repeal Act was applicable in Haryana, Punjab and all the Union Territories. Subsequently, the state governments of Uttar Pradesh, Gujarat, Karnataka, Madhya Pradesh, Rajasthan and Orissa adopted the Repeal Act.

The Repeal Act basically emphasises the need to impose a vacant land tax on the land likely to be made available after the repeal of the Act. It also has a provision for the economically weaker sections and the low-income group houses, which is taken into consideration while sanctioning housing projects. The Repeal Act attempts to free the supply of usable urban land for housing construction, thereby lowering the impediments for large-scale development projects.

### **Rent Control Acts**

Various states and union territories have formulated their own Rent Control Legislations, with respect to regulating chargeable rents, recovery and possession of the property and tenancy rights. These laws acted as a disincentive towards investments in housing for rental purposes. The much-required amendments in these Acts will ensure that the vacant housing stock be made available in the market for occupation.

### **Registration fees and stamp duties**

Stamp duty needs to be paid on all documents that are registered, the rate for which varies by state. Most states charge very high registration fees and stamp duties on property transactions. The rate of stamp duty varies from 5 per cent in Andhra Pradesh to 14.7 per cent in Orissa. Some states even have double stamp incidence, first on land and then on its development. High stamp duty and registration costs lead to under-reporting of the agreement value of properties. In developed markets such as Singapore and Europe, the rate varies from 1-2 per cent.

### **Key Segments in the Real Estate Industry:**

#### ***Residential real estate development***

The house construction activity has been on the upswing for the past 5 years, aided by population growth and urbanisation. Moreover, it has been observed that the boom is localised to the organised urban housing segment, extending to the relatively prosperous rural belts. This growth is being driven by the following factors:

- Faster growth in urban households as a result of nuclearisation and reduction of average size of household.
- Easy availability of housing finance and a favourable tax regime.
- Conversion from slum, kutchra or semi-pucca in urban areas to pucca non-slums (driven by income).

According to CRIS INFAC Construction Annual Review (Feb 2006), housing (particularly urban housing) will continue to demonstrate robust growth over the next 5 years, helped by rising penetration of housing finance and favourable tax incentives.

Based on the analysis of the abovementioned drivers, CRIS INFAC has estimated the number of housing stock in 2003-04 at 197 million. Close to 4.7 million new houses were added to this stock in 2004-05. This number is expected to grow at a CAGR of 2.4 per cent over the next 5 years to reach 5.27 million new houses in 2009-10.

The total Floor Space Area ("FSA") is estimated at 96 billion sq. ft. in 2003-04, with an estimated 2.5 billion sq. ft. added in 2004-05. The new FSA added is expected to grow at a CAGR of 4 per cent over the next 5 years to reach 3 billion sq. ft. by 2009-10. This would roughly translate into 14 billion sq. ft. to be added over a period of 5 years. During the same period, the total housing construction investment is estimated at Rs 9,176 billion.

### *Trend towards high-rise in urban locales*

A large proportion of the above demand for houses, especially in urban centres such as Mumbai, Bangalore, Delhi (Gurgaon, Noida) and Pune, is likely to come from high-rise residential buildings. Since this is a fairly new segment, the growth of the high-rise segment will be faster as compared to the growth of the urban housing segment. The reasons for the construction of high-rise apartment buildings are the lack of space in cities such as Mumbai and proximity to offices and IT parks in places such as Gurgaon, Bangalore and Pune. The high-rise culture is gradually seeping into other cities such as Kolkata, Hyderabad and Chennai due to increasing affordability, nearness to IT/BPO parks and the township concept being embraced within close proximity to such IT/BPO parks.

### **Commercial real estate development**

Commercial construction comprises construction of office space, hotels, hospitals, schools, stadiums etc. In India, most of the investment in this segment is driven by office space construction. Within office space construction activity, almost 70-75 per cent of the demand comes from IT/BPO/call centres. The other key demand drivers include banking and financial services, FMCG and telecom. This dependency on IT/ITES is expected to continue due to India's emergence as a preferred outsourcing destination, despite China and Russia also emerging as strong contenders.

According to CRIS INFAC Construction Annual Review (Feb. 2006), in the last 4 years, while the IT sector continued to grow at a healthy rate, the ITES sector stole the show with a phenomenal 48 per cent growth. Going forward, revenue from ITES is expected to grow at a CAGR of 30 per cent to reach \$19.7 billion in 2009-10; and the IT service industry will clock export revenues of \$28.5 billion by 2008-09, growing at a CAGR of 26 per cent.

Consequently, the growth in the sector will translate into substantially higher demand for commercial space, adding to the overall investment in construction activities.

CRIS INFAC believes the growth in IT/ITES is likely to translate into construction investments of Rs. 148 billion (118 million sq ft) by 2007-08 as compared with investments of Rs 74 billion (61 million sq. ft.) in the last 3 years. The investments are based on the manpower/workspace requirement in the sector.

Knight Frank, an international property agency, estimates that the growth in the IT and ITES sectors is likely to require over 118 million square feet of additional commercial space between Fiscal 2006 and 2008 ("Commercial Property Review," (3<sup>rd</sup> Quarter, 2004) Knight Frank).

### **Retail real estate development**

Retail boom to result in construction investments of Rs. 112 billion over the next 5 years (*Source: CRIS INFAC Construction Review, Feb 2006*)

CRIS INFAC estimates that retail spending in India in Fiscal 2005 was Rs. 9.9 trillion, of which organised retail accounted for Rs. 349 billion, or approximately 3.5%. The organised retail segment in India is expected to grow at a rate of 25% to 30% over the next five Fiscals. The growth of organised retail is expected to be driven by demographic factors, increasing disposable incomes, changes in shopping habits, the entry of international retailers into the market and the growing number of retail malls ("CRIS INFAC Relating Annual Review," (September 2005) CRIS INFAC).

CRIS INFAC believes the current spark in mall construction activity across India will result in around 105 million sq ft of mall space by 2010. This would translate into construction investment of Rs. 112 billion over the next 5 years. (*Source: CRIS INFAC Construction Review, Feb 2006*)

The increase in disposable incomes, demographic changes (such as the increasing number of working women, who spend more, the rising number of nuclear families and higher income levels within the urban population), the change in the perception of branded products, the growth in retail malls, the entry of international players and the availability of cheap finance will drive the growth in organised retail.

CRIS INFAC Construction Annual Review (Feb. 2006)

### *Movement towards smaller cities*

India has four metros: Mumbai, Delhi, Kolkata and Chennai, and an equal number of mini metros: Bangalore, Hyderabad, Ahmedabad and Pune. Initially, most retail players launched their ventures in the metros and mini metros. However, of late, the retail phenomenon is spreading to smaller cities. Players are entering these cities early to gain a first-mover advantage, that is, a larger customer base and a higher share of loyal customers. Over the past few years, the share of these cities in the percentage of organized retail has been growing steadily.

Of the total malls space to be available by 2010, Mumbai, Pune, NCR (including Gurgaon, Noida, Greater Noida, Faridabad and Ghaziabad), Bangalore and Hyderabad will have a share of 74 per cent. The balance 26 per cent will be made up by cities such as Kolkata, Chennai, Ahmedabad, Jaipur, Nagpur, Lucknow, Indore, Ludhiana and Chandigarh.

### **Hospitality**

With the increase of disposable income in the hands of upwardly mobile Indian middle class, the propensity of spending a larger portion of their income on tours and travels are going up. This factor, coupled with the changing lifestyle of Indian population and an increase in business travel due to a growing economy, has created demand for quality hotels/resorts across this country. In addition, India is also emerging as a major destination for global tourism which in turn pushing up the demand for hotels/resorts across India. This increasing demand for hotels/resorts across India, offers yet another opportunity for real estate development.

Hospitality industry is witnessing significant changes in its dynamics with increase in tourists and business travel to India. As per the World Travel and Tourism Council, 2006 (WTTC), India's Travel & Tourism is expected to grow 8.4 % in 2006 and by 8 % per annum, in real terms, between 2007 and 2016. WTTC has also projected India as one of the emerging tourism markets having potential of earning US\$24 billion annual foreign exchange through tourism by 2015. With the industry expected to grow at 8-9% in 2006, the number of business travelers to the country are also likely to increase. (Source: Central Statistical Organisation).

The majority of segments in the Indian hotel industry have shown robust recent growth in room rates as well as occupancy rates. With increased demand and limited availability of quality accommodation, the average room rates in metropolitan markets have grown at a rapid pace over the last two years. The general increase in room rates and occupancy rates is expected to contribute significantly to the demand for new hotel developments.

### **SEZs**

SEZs are specifically delineated duty free enclaves deemed to be foreign territories for purposes of Indian custom controls, duties and tariffs.

Under the SEZ Act, a Board of Approval (the "SEZ Board") has been set up, which is responsible for promoting SEZs and ensuring their orderly development. The SEZ Board has the authority to approve proposals for the establishment of SEZs, the operations to be carried out in the SEZs by developers and the scope of foreign collaborations and FDIs.

According to the Ministry of Commerce and Industry, 61 SEZs are currently approved and under establishment in India. The currently functional SEZs in India are located at Andheri (East) (Maharashtra), Cochin (Kerala), Kandla and Surat (Gujarat), Chennai (Tamil Nadu), Visakhapatnam (Andhra Pradesh), Falta (West Bengal), Noida (Uttar Pradesh), Manikanchan and Salt Lake (Kolkata), Indore (Madhya Pradesh), Jaipur (Rajasthan) and Mahindra City (Chennai) (Ministry of Commerce and Industry, Department of Commerce (<http://sezindia.nic.in>)). As of March 31, 2005, there were 811 units, employing over a 100,000 people, in operation in the eight SEZs. Investment by the units in these zones is in the order of Rs. 18 billion.

SEZs, by virtue of their size, are expected to be a significant new source of real estate demand. Further, SEZ developers are also eligible for tax benefits under Section 80-IA of the Income Tax Act, pursuant to which they are eligible to avail themselves of tax exemptions for a block of 10 years in a 15 year period at the option of the relevant developer. In addition, developers may import/procure goods without paying duty for the development, operation and maintenance of the SEZ.

### **Future outlook**

Easy availability of housing loans at much lesser rates has encouraged people who are small investors to buy their own house, which may well be their second home too. High net worth individuals have also demonstrated greater zeal in investing in residential real estate with an intention of reaping capital appreciation and simultaneously securing regular returns.

In the wake of strong economic growth, real estate market should continue to gain momentum resulting in falling vacancies in Central Business District areas and more development in suburbs; it is unlikely that commercial property prices will rise or fall significantly, beyond rational reasoning.

As the stamp duty on lease and license agreements has been further reduced, it should further attract interest and in this manner encourage investors and occupiers to increasingly participate in the opportunity.

Heightened retail activity will give upward push for space requirement as will the IT / ITES sector growth.

## OUR BUSINESS

### OVERVIEW

We are a real estate development and construction company with operations in 30 cities and 9 states in India. We are involved in residential and commercial real estate development projects ranging from integrated townships, group housing and retail and other commercial properties, hotels, information technology and bio-tech parks to special economic zones. Our operations span across all aspects of real estate development, from the identification and acquisition of land, to the planning, execution and marketing of our projects.

We commenced business in 1989 as a construction and contracting company, and as of March 31, 2007, we have completed more than 120 construction projects in such capacity. In 2001, we diversified into the real estate development business with a focus on residential and commercial properties. As of March 31, 2007 we have completed eight residential projects, consisting of seven group housing and one integrated township project, and two commercial projects, including retail and office space, covering approximately 5.13 million sq. ft. of built-up / developed area. We have diversified our project portfolio by undertaking projects for the development of hotels, information technology and bio-tech parks.

As of March 31, 2007, we had access to land reserves of approximately 3,255 acres (including approximately 571 acres of land belonging to joint ventures and collaborations in respect of which our Economic Interest is approximately 74% calculated on a weighted average basis in relation to such land), of which approximately 3,096 acres (including approximately 451 acres of land belonging to our joint ventures and collaborations) relate to projects that are currently under development or under various stages of approval for development, representing approximately 150 million sq. ft. of saleable area, and approximately 159 acres (including approximately 120 acres belonging to our joint ventures and collaborations) relate to our future projects and projects that are currently in various phases of planning.

As of March 31, 2007, we had 52 current residential and commercial projects consisting of 21 group housing projects, 16 integrated townships, 14 shopping malls and commercial complexes and 1 hotel. Our 'current projects' include 38 projects which are under development and 14 which are under various stages of approvals for development. We expect to commence development on these 14 projects within Fiscal 2008. The 16 integrated townships are essentially 'mixed use' townships consisting of residential and commercial projects and are expected to include 10 group housing projects, 16 commercial projects, one bio-tech park and one information technology park. We are also developing projects in the hospitality sector. Our hotels at Amritsar, Greater Noida and Patiala are part of commercial malls, which are under construction. We have applied for change of land use for our hotel project in Faridabad.

With the development of the Indian economy and the resulting increase in corporate and consumer incomes, as well as foreign investment, we see significant opportunities for growth in the real estate business.

Our Total Income have grown from Rs. 1,455.56 million in Fiscal 2003 to Rs. 14,396.79 million in Fiscal 2007, at a CAGR of 77.34% and our profit after tax and minority interest increased from Rs. 47.67 million in Fiscal 2003 to Rs. 2,572.61 million in Fiscal 2007, at a CAGR of 171.04%. The year over year change in our total income over its immediately preceding year has been Rs. 6,198.17 million (75.60%), Rs. 4,232.63 million (106.72%), Rs. 1,128.74 million (39.78%) and Rs. 1,381.69 million (94.92)% for Fiscal 2007, 2006, 2005 and 2004, respectively. The year over year change in our net profit after tax and minority interest over its immediately preceding year has been Rs. 1,384.46 million (116.52%), Rs. 1,137.79 million (2259.31%), Rs. (33.12 million) (-39.67%) and Rs. 35.81 million (75.12%) for Fiscal 2007, 2006, 2005 and 2004, respectively.

We were one of the first construction companies in northern India to receive an ISO 9001:2000 certification.

Our promoter and founder, Mr. Rohtas Goel, has more than 20 years of experience in the construction and real estate business. After the completion of this Issue, our Promoters and Promoter group is expected to continue to own 89.70% of our Equity Shares (assuming the Green Shoe Option is not exercised) or 88.80% of our Equity Shares (assuming the Green Shoe Option is exercised in full).

The saleable area presented for our projects are management estimates based on our current plans that have either been approved or are under various phases of approval. The saleable area actually developed may differ from these estimates based on various factors such as market conditions, title defects, inability to obtain regulatory approvals or changes in government regulations. See "Risk Factors — Internal Risk Factors and Risks Relating to Our Business — xi. Our statements regarding areas under development and saleable area are based on management estimates".

### STRENGTHS

We believe that the following are our principal competitive strengths:

#### ***Extensive land reserves***

We recognize that extensive land reserves are the most important resource for a real estate developer. As of March 31, 2007, we had access to land reserves of approximately 3,255 acres (including approximately 571 acres of land belonging to joint ventures and collaborations in respect of which our Economic Interest is approximately 74% calculated on a weighted average basis in relation to such land), of which approximately 3,096 acres (including approximately 451 acres of land belonging to our joint ventures and collaborations) relate to projects that are currently under development or under various stages of approval

---

for development, representing approximately 150 million sq. ft. of saleable area, and approximately 159 acres (including approximately 120 acres belonging to our joint ventures and collaborations) relate to our future projects and projects that are currently in various phases of planning.

### ***Ability to identify, acquire and consolidate land***

One of our key strengths is our ability to identify suitable tracts of land for our developments and to acquire and consolidate such land. We have an in-house 'project research and land identification' team consisting of 23 employees who are involved in gathering relevant market data, assessing the potential of a location after evaluating its demographic trends and in identifying relevant government schemes and incentives. On the basis of such data, our in-house 'project research and land identification team' identifies suitable tracts of land in such cities and towns for our projects. We also have a team of 28 employees who interact with the owners of the land and co-ordinate the purchase of the lands for our developments from the landowners.

### ***Experience in the construction industry with a track record for quality of construction and for timely delivery of projects***

We have been in the construction and contracting business for 18 years and have a high level of technical expertise in executing our projects and as of March 31, 2007, we had completed more than 120 construction projects in such capacity. Our experience in the construction business has also given us the ability to plan and execute our projects in a timely manner. We understand the intricacies of project planning and dealing with execution related issues like raw material procurement, labour, suppliers and other third parties. We have a team of civil engineers, architects and others who are professionally qualified and experienced in their respective fields and are able to monitor the execution and implementation of our projects.

### ***An established brand image and consumer confidence***

We have developed a reputation for delivering quality projects in a timely manner. Our experience in the construction business and our recent real estate projects have created awareness among consumers about the Omaxe brand. As of March 31, 2007 the total number of units that we have sold and/or booked to our customers consist of more than 19,000 residential and 2,000 commercial property units. We were one of the first construction companies in northern India to receive an ISO 9001:2000 certification. We have established 'Omaxe Care', a dedicated 24/7 helpline for our customers. We were one of the first real estate developers to provide this service, which is a one-point interface with our customers in relation to any of their specific requirements, queries or grievances.

### ***Ability to identify emerging trends in customer requirements and strong marketing network***

We believe our ability to identify emerging trends in customer requirements and developing projects to suit such requirements is our strength. Our marketing and sales team is our interface to potential customers and clients. This interface provides us an insight into the customer requirement trends in terms of type, location and price of the product and guides us to plan our promotional activities. In addition, we have a strong marketing network of more than 800 business associates. Our marketing is structured considering the nature of the project and the customer base at which the project is targeted. Our sustained and structured marketing over the cycle of the project results in wide exposure of our products to the target audience. We believe that the presence of well known brands in our large retail outlets ensures confidence among potential customers.

### ***We have a diversified business within the real estate sector***

Our real estate business has diversified across geographical locations and in different real estate projects that we are involved in. We have projects and land reserves in 30 cities and 9 states in India, and as of March 31, 2007, we had 52 current residential and commercial projects consisting of 21 group housing projects, 16 integrated townships, 14 shopping malls and commercial complexes and 1 hotel. Our 'current projects' include 38 projects which are under development and 14 which are under various stages of approvals for development. We expect to commence development on these 14 projects within Fiscal 2008. We are also developing hotels at Amritsar, Greater Noida and Patiala as part of commercial malls, which are under construction. We have applied for change of land use for our hotel project in Faridabad.

### ***Emphasis on innovation***

We believe that innovation is the key to be a successful real estate development company in India. We were one of the first developers to conceptualize and develop theme malls in northern India. Some of our theme based projects are:

- Wedding Malls: Wedding malls are meant to be 'one-stop shops' for all wedding related arrangements and will include shops and outlets selling wedding wear, jewellery, floral decorations and other wedding related accessories. They will also include food courts, multiplexes and banquet halls. We are currently developing 'Wedding Mall, Gurgaon', 'Wedding Mall, Agra' and 'Wedding Mall, Patiala'.
- 'House 2 Home' will include shops selling interior design-ware, furniture and other residential accessories to set-up and furnish a home. We are currently developing a 'House 2 Home' mall at Gurgaon.
- 'NRI City' in Greater Noida, is a mini-township in NCR and provides a choice of residential housing from apartments to individual plots with world-class amenities.

#### ***Experienced and professional management***

We have a team of professionals, many of whom have over 25 years of experience in their respective fields. Our founder, Mr. Rohtas Goel has more than 20 years of experience in the construction and real estate business. We provide our staff with a corporate environment that encourages responsibility, autonomy and innovation. We believe that the experience of our management team and its in-depth understanding of the real estate market in India will enable us to continue to take advantage of both current and future market opportunities.

#### **STRATEGY**

Our strategy is to be a leading real estate development company with the highest standards of professionalism, ethics and customer service and to thereby contribute to and benefit from the growth of the Indian economy. The key elements of our business strategy are as follows:

#### ***Expanding into new locations across India and focus on Tier 2 and Tier 3 cities***

In addition to focussing on Delhi, Mumbai, Noida, Gurgaon, Kolkatta, Chennai, Hyderabad and Bangalore ("Tier 1 Cities"), we also intend to focus on non-Tier 1 cities in India ("Tier 2 and Tier 3 Cities") where we believe significant growth prospects exist with increasing purchasing power for quality real estate projects at reasonable prices. We also believe that the costs of developing projects in Tier 2 and Tier 3 cities are lower than for Tier 1 Cities and hence we will be required to commit a lesser amount of capital to develop these projects. In Fiscal 2007 and Fiscal 2006, 62.21% and 83.23%, respectively, of our real estate revenues from sale of properties (excluding ancillary income) came from projects we undertook in Tier 2 and Tier 3 cities in India. Our focus on Tier 2 and Tier 3 cities and in identifying locations that provide fiscal incentives for real estate development has been instrumental in providing us the early mover advantage in these locations.

#### ***Continue to diversify the portfolio of our projects***

We intend to maintain a spread of the different types of residential and commercial projects we are involved in as this provides us with a strategy for growth as well as mitigating the risk of focussing on only one or two types of projects. Our strategy is to position ourselves to capitalize on the opportunities generated across the country for the types of projects that we develop and in various other sectors of the Indian economy. We constantly explore innovative strategies for marketing our projects, diversifying revenue streams and for enhancing the value of our brand. We propose to continue to acquire development rights over lands for implementation of our projects at opportune times.

Our goal is to build our residential real estate business across India. We plan to focus on the development of group housing projects for the mid income to higher income groups in key locations in India. As part of our growth strategy, we also plan to focus on the development of integrated townships in key locations in India. We also intend to take advantage of increasing urbanisation by investing in the development of integrated townships on the peripheries of cities around the country wherever we see opportunity.

#### ***Outsourcing to increase the scale of operations***

We are focussed on concentrating on our core strength of real estate development and on proven track record in the construction industry. We outsource some critical activities like designing, architecture and construction to take advantage of the expertise of reputed companies, to reduce costs and to add value to our projects. We use the past experience of our team in construction and contracting business for monitoring and supervising the architectural and construction activities that we outsource. This allows us to increase the scale of our operations.

#### ***Enter into joint ventures/collaborations and investment in innovation***

- We intend to enter into key arrangements with strategic partners to enhance our real estate development business and to be able to develop and deliver state of the art projects. We are also exploring arrangements with several other parties to be able to develop additional theme malls and other commercial complexes. We intend to enter into joint ventures and joint development agreements with relevant State development authorities to develop integrated townships. We have entered into a private-public participation agreement with the Patiala Urban Planning & Development Authority to develop an integrated township at Patiala over an area of 336.50 acres. We are committed to innovation in our projects. We were one of the first developers to conceptualize and develop theme malls in northern India and we are developing 'Wedding Mall, Gurgaon', 'Wedding Mall, Agra' and 'Wedding Mall, Patiala' and the 'House 2 Home' mall in Gurgaon.

### LAND RESERVES

We have access to extensive land reserves and as of March 31, 2007, we had access to land reserves of approximately 3,255 acres (including approximately 571 acres of land belonging to joint ventures and collaborations in respect of which our Economic Interest is approximately 74% calculated on a weighted average basis in relation to such land), of which approximately 3,096 acres (including approximately 451 acres of land belonging to our joint ventures and collaborations) relate to projects that are currently under development or under various stages of approval for development, representing approximately 150 million sq. ft. of saleable area, and approximately 159 acres (including approximately 120 acres belonging to our joint ventures and collaborations) relate to our future projects and projects that are currently in various phases of planning. Approximately 94.05% of our land reserves consist of freehold land and the remaining 5.95% consist of lease-hold land. In addition, approximately 17.55% of our land is being developed under joint development or collaboration agreements.

We are in the process of acquiring additional land in different parts of the country to further expand business activities. Although land prices have increased substantially in recent years, we recognise that our business growth is dependent on replenishing our land reserves, and so we are currently engaged in an extensive land acquisition programme.

#### **Group Housing – Apartments and Condominiums**

Our group housing projects consist of developing apartment and condominium-type housing. We are currently in the process of developing 21 such residential group housing projects (including 15 projects that are currently under development) with approximately 67 million sq. ft. of saleable area under development. In order to decide on the location, design and specification for these projects, we analyse various qualitative and quantitative data obtained through extensive market research undertaken by an internal development team that considers a number of factors, including target population in the catchments areas and economic standards in the general urban area. The composition of the development is determined accordingly. We develop stand alone high and low rise apartments that are generally incorporated into a larger development that may include additional amenities such as gymnasiums, gardens, pools, clubs, security systems and recreational areas. We also consider group-housing projects to be part of our 'integrated township' projects. For more information, see the section '—Integrated Townships' on page 66.

We create innovative architectural variety within our projects by offering numerous models, floor plans, and exterior styles in an effort to enhance home values by creating diversified neighbourhood looks within our projects.

Our residential real estate projects are focused on developments of apartments for mid income to higher income groups and to a lesser extent, luxury and super luxury residential accommodation. We completed Royal Residency, our first major residential

## OMAXE LIMITED

group housing project in 2004. We are in the process of developing approximately 67 million sq. ft. of saleable residential group housing space and are in the process of acquiring more land for further developments.

We have implemented innovative approaches to the development and marketing of our residential projects and were one of the early developers to focus on theme-based projects. We see the leisure facilities associated with our luxury and super luxury residential accommodation as not only a powerful marketing tool, but also an additional source of revenue. We also include penalty clauses in our agreements in favour of our customers if there is a delay in the delivery of the projects by us. While we have included these clauses voluntarily so far, it may become mandatory to include these clauses in our agreements in the future. For more information on penalty clauses, see "Risk Factors" on page xi.

Under the terms of the agreement, of the total area of approximately 36.22 acres of land, we have transferred approximately 14.81 acres of land representing approximately 1.26 million sq. ft. of saleable area to the joint venture entity in which we will have a 50% ownership interest and Azorim will have the ownership interest of the remaining 50%. Azorim was incorporated in Israel in the year 2006. The paid-up share capital of Azorim is equivalent to Rs. 0.1 million as on December 31, 2006. It has not issued any financial statements as it was incorporated in 2006.

'The Nile' at Gurgaon project is an 870,422 sq. ft. group-housing development incorporating an 'Egyptian' theme to its architecture and design. This modern development will consist of 416 apartments, together with a landscaped park and other modern amenities.

### Integrated Townships

Our integrated township projects are focused on the creation of new suburbs through large scale developments. We are in the process of developing 16 integrated townships (including 9 which are currently under development) in India with approximately 2,180 acres and over 77 million sq. ft. of saleable area. Our integrated township projects consist of independent villas, plots, group housing developments consisting of apartments and condominiums and commercial complexes. We develop integrated townships in large areas of land. Integrated townships are essentially mixed-use areas. Although we are required to conform to prescribed proportions of residential development, commercial development, open space and community amenities within each integrated township, we are essentially able to prescribe the manner in which used. We completed 'NRI City' at Greater Noida, our first township, in June, 2006.

The 'NRI City' township has built-up/developed area of 3.75 million sq ft. and is located in the NCR at Greater Noida. The township consists of 584 individual plots and has a wide choice of multistoried flats. The township also has a commercial centre, school, nursing home and has the provision for public utility services.

The key feature of this township is its proximity to the prime locations in and around Lucknow and its vicinity to the local airport.

### **Commercial Projects**

The portfolio of our commercial projects consists of shopping malls, commercial complexes, multiplexes, and office premises. Our commercial real estate projects are focussed on developing an extensive portfolio of commercial properties built to international standards. Our first significant commercial development was 'Omaxe Plaza' at Gurgaon, Haryana. As of March 31, 2007, land equivalent to approximately 4.89 million sq. ft. of saleable area has been acquired either directly or through collaborations to develop our commercial projects.

We have sought to strengthen and expand our relationships with our commercial clients. As of March 31, 2007, we have completed two commercial projects and are in the process of developing 14 commercial complexes, with approximately 4.89 million sq. ft. of saleable area under development. In addition to these projects that have been or will be developed on a stand-alone basis, we are also developing commercial complexes representing approximately 11.99 million sq. ft. as part of our integrated townships projects. For more information see the section titled "Integrated Townships" on page 66.

Our malls have a superior tenant profile, including established and anchor tenants and are characterised by aesthetic design, high quality infrastructure as well as leisure and entertainment options such as cinema complexes, food courts and restaurants. The locations of our malls, as well as the mix of retail outlets within them, are carefully planned based on the profile of the relevant catchment areas as well as our understanding of consumer preferences, with the aim of attracting shoppers and ensuring an attractive mix of international brands, national retailers and leading local retailers. In our mall expansion strategy, we endeavour to cater to the expansion strategies of our tenants providing them with retail space in a variety of preferred locations and encouraging them to take space in a number of our developments. We were one of the first developers to conceptualize and develop theme malls in northern India and we are currently developing 'Wedding Mall, Gurgaon', 'Wedding Mall, Agra' and 'Wedding Mall, Patiala' and the 'House 2 Home' in Gurgaon.

Our retail business model includes both the sale and the ownership and leasing of our retail developments. In the past, we have sold almost all of the units in our retail developments, generally before completion of construction, with payments of the purchase price being made in instalments after payment of an initial deposit. In the future, we plan to lease a substantial portion of the area while retaining ownership though we may also opt for selling the units that we develop in these commercial projects.

Our completed projects are the 'Omaxe Arcade' at Greater Noida and 'Omaxe Plaza' at Gurgaon.

'Omaxe Arcade' is a shopping mall in Greater Noida and is located near the 'NRI City'. This project was the first freehold shopping complex in Greater Noida and has a developed area of approximately 55,000 sq.ft. The project was developed with a state of the art fire protection system and with a 24 hours power back-up system for the entire project. The project was completed in February 2005.

The 'Omaxe Plaza' at Gurgaon is a commercial project consisting of a shopping mall, a commercial centre and 2 multiplex cinemas. This commercial complex has a developed area of approximately 280,000 sq. ft. and was completed in December, 2005. This project is located in the proximity of the residential areas of Gurgaon and caters to more than 20,000 families living in these areas. The project was completed in December, 2005.

In addition to the commercial projects set out in the table above, each of our integrated township' projects include commercial complexes. We generate revenue from the sale and lease of these properties. Historically, we have derived income from the sale of these projects. We have now also begun to lease a portion of these projects.

Our significant current commercial projects are the 'Omaxe Connaught Place' in Greater Noida, 'Omaxe Terminal' in Amritsar, 'Wedding Mall, Gurgaon', 'Wedding Mall, Agra' and 'Wedding Mall, Patiala'.

'Omaxe Connaught Place' is a project on which construction was commenced in June, 2006 and the expected completion date for this project is September, 2009. The project has a total saleable area of approximately 1,490,196 sq. ft. and will feature modern office complexes, a world class shopping mall, an eight-screen multiplex, a five star hotel, food courts and various family entertainment centres.

Our "Wedding Mall, Gurgaon", 'Wedding Mall, Agra' and 'Wedding Mall, Patiala' have saleable area of approximately 180,338 sq. ft., 315,592 sq. ft. and 181,487 sq. ft. respectively and are meant to be 'one-stop shops' for all wedding related arrangements and will include shops and outlets selling wedding wear, jewellery, floral decorations and other wedding related accessories. The 'Wedding Mall' in Agra will also include a 3 screen multiplex and all the wedding malls will also include food court and a speciality restaurant.

The 'House 2 Home' mall is being constructed at Sohna Road at Gurgaon and has a saleable area of approximately 175,329 sq. ft. This development will include shops selling interior design-ware, furniture and other residential accessories to set-up and furnish a home. The mall is located near the residential hub of Gurgaon providing the mall with an accessible customer base for the products and services available at the mall.

### **Hospitality**

There has been a substantial increase in demand for high quality accommodation across the Indian hotel sector largely due to increased business tourism, a decline in airfares and greater investment in infrastructure. Our strategy is to build hotels in the three-star and five-star categories. We intend to use our existing real estate capabilities to build these hotels. We have five hotels which are in the planning phase. Our hotels at Amritsar, Greater Noida and Patiala are part of commercial malls, which are under construction. We have applied for change of land use for our hotel project in Faridabad.

### **Information technology/bio-tech parks**

The Indian commercial real estate market has witnessed strong demand. We expect that sectors such as IT, ITES and other service sectors and manufacturing sector will continue to drive demand for commercial real estate. Pursuant to the joint development agreement dated November 16, 2006 with Patiala Urban Planning and Development Authority, Patiala, we are required to develop a bio-tech park and an information technology park which will be part of our township project in Patiala. For

further details, please refer to the section titled "Government and Other Approvals" on page 420 of the Prospectus. We intend to develop the IT and bio-tech parks built to international standards in order to attract key multinational tenants. A key element of our growth strategy is to anticipate the expansion plans of our clients and thereby cater to their growing real estate requirements.

### **Special Economic Zones**

The Government of India has taken a number of measures to encourage foreign investment in, and exports from, India. These measures include the introduction of a Special Economic Zone regime in 2005 under which land is deemed to 'foreign territory' for the purposes of Indian customs controls, duties and tariffs. This policy is, however, under review. We have received in-principle permission from the Board of Approvals, GoI for SEZs, for a multi-product SEZ to be spread over approximately 15,000 acres in Rajasthan. However, the Empowered Group of Ministers (EGOM) on SEZ has prescribed a ceiling of 5,000 hectares (12,355 acres) for SEZ.

### **Our Construction and Contracting Business**

We commenced business as a construction and contracting company in 1989. As of March 31, 2007, we have completed construction of more than 120 projects on a contractual basis. Typically, under a contractual assignment, we undertake to perform construction for third parties on pre-agreed terms and conditions. Our scope of work in contractual contracts is all inclusive of electrical works, plumbing works, metal and glazing works, interiors and construction. In certain cases, we used to undertake finishing and interiors related work on structures that have already been built.

We have constructed a variety of projects on a contractual basis. Since 2001, our focus has moved to the real estate development division and since March 31, 2006 we have not entered into any new commitment in the construction and contracting business. As a result, our revenues from our construction and contracting business have declined in Fiscal 2006 and 2007.

### **Joint Developments and Joint Ventures**

We have also entered into a joint development agreement on a private-public participation basis with the Patiala Urban Planning & Development Authority to develop an integrated township at Patiala, Punjab over an area of 336.50 acres. The township will consist of residential housing and commercial project and will also include an IT park and a bio-tech park. The revenue sharing arrangement provides for the sharing of the revenue generated from this project with the Patiala Urban Planning & Development Authority with 85% of the revenue being retained by us and 15% by the Patiala Urban Planning & Development Authority. We intend to enter into joint ventures with other State development authorities to develop integrated townships.

### **OUR PROJECT EXECUTION METHODOLOGY**

The execution methodology that we employ for our projects can be divided into the following distinct activities:

#### **Identification of potential areas of development:**

One of the key factors in the real estate development sector is the ability to assess the potential of a location after evaluating its demographic trends. We rely on our experience and ability of our management to evaluate potential locations. We also use our experience to evaluate locations where we can gain the early mover advantage. We have commenced real estate development projects in New Delhi, Greater Noida, Noida, Agra, Ghaziabad, Lucknow, Mathura, Gurgaon, Bahadurgarh, Faridabad, Sonapat, Ajmer, Jaipur, Bhiwadi, Kishangarh, Amritsar, Derabassi, Ludhiana, Mohali, Rajpura, Baddi, Indore, Palwal, Raipur, Rohtak and Patiala. In addition, we are one of the earliest real estate development companies to have projects in Jaipur, Indore, Palwal and Rohtak.

The process of land identification starts from the stage of selecting an appropriate area which has growth potential. This is done by our projects research team which gathers market data on possible prospects while selecting an area for development. We also take the views of local real estate marketing professionals into account. Thereafter, a survey is conducted at the

## OMAXE LIMITED

---

proposed site and a preliminary feasibility report is prepared. The report is based on an analysis of the certain criteria, including, among other things (a) the standard of living and disposable income of the population of the location, (b) the growth prospects of the towns in terms of trade and industry and (c) financial viability of the project. The next step, after area identification, involves identifying the type of project to be undertaken in that particular area and deciding the scale of the project. Typically, decisions at this stage involve examining the viability of developing townships or commercial complexes or residential towers or SEZs on the identified project site. The final decision on the location, nature, financial feasibility and scale of each project is taken by our senior management.

### **Evaluation of applicable laws and obtaining requisite approvals:**

On the evaluation of an area as a feasible area for the implementation of a project, it is imperative to understand the legal regime governing land development in the location, which varies from state to state. We also evaluate the factors which affect the obtaining of the approvals required for the implementation of the project. The approvals generally required for a real estate development project include approvals for building plans, for the conversion of agricultural lands to non-agricultural lands, where applicable, the approval of lay outs and approvals related to certain infrastructure facilities such as power and water. Similarly, approvals from the fire authorities are required for buildings above a certain stipulated height. Project completion certificates are obtained from the appropriate authorities after the projects have been completed in accordance with applicable law. In the case of SEZ projects, we are required to obtain the recommendation of the concerned state government and approval of the Gol.

### **Acquisition of title and/or development rights of land:**

Rights for purchase of land primarily depend upon the laws and regulations governing the location of the proposed real estate development project. In this process, we acquire land or development rights over lands through the following models:

#### *Purchase of land directly from title holders*

We purchase land directly from title holders. We are particular about formalizing the transfer of title and due recording of such transfer in the appropriate land records. We execute conveyance deeds in respect of such properties in order to acquire clear title to the property.

In cases where agricultural lands are being acquired by us and conversion from agricultural land to non-agricultural is required, we may (a) either acquire the land and apply for conversion prior to the completion of the sale, or (b) in the event there are minimum area requirements for application for conversion from agricultural land to non-agricultural land, applications may be made jointly by us and the title holders and upon the receipt of the permission for change in use of land, the land and permission for conversion may be transferred to us at our option or the land may be developed by us in arrangement with the title holders.

#### *Allotment by Government Authorities*

We also acquire land on freehold basis or leasehold (for periods which typically vary between ninety to ninety-five years) with the concerned development authority. Once the land is purchased or leased by us, we develop the various plots into residential or commercial units and realize the sales proceeds of the plots or buildings built thereon from the customers. We have acquired land for the projects from such governmental authorities in several towns including Delhi, Noida, Greater Noida, Lucknow, Pantnagar and Patiala. We then develop this land corresponding to the terms of the approvals and prescribed usages and market the same. An advantage of acquiring land by this process is that such lands are typically free from any defects of title, the land use and pattern of development is pre-determined and the time required in obtaining approvals is reduced, thereby resulting in early launch of the project and improved cash flows. In certain cases the authorities prescribe certain charges on resale of built-up areas by the buyers (in cases where land is acquired on leasehold) and such conditions are to be complied with by the buyers.

#### *Acquisition of land by Subsidiaries and Promoter group companies*

We also advance money to our Subsidiaries and to Promoter group companies with whom we enter into MoUs and/or collaboration agreements to acquire lands identified by us to collaborate for development of real estate projects. We get the sole right to develop and market such lands. We adjust the cost of acquisition of the land, including other expenses and costs incurred by the other entity against the money advanced by us. We transfer a pre-determined developed area is entailed to the other entity under such MoU/Collaboration agreements.

#### *Acquisition of development rights involving other entities*

We acquire the right to develop properties through collaboration with other entities. These other entities are title holders of lands and we act as the developers. Typically, the project is conceived and developed by us in accordance with the terms of our agreement with the other party. The title holder is typically given the option, as consideration, to either share the sale proceeds or area in a pre determined proportion which may range approximately between 15% to 65% depending upon the

nature of the project and the location of the land or to receive a pre determined percentage of the developed area which he may market at his cost and expense.

### **Designing and Construction:**

The design and planning of our projects is either completed by our in-house planning department or by external architects and structural consultants appointed by us. The majority of architects and structural consultants engaged by us are specific to a particular project and are drawn from a pool of designers and architects. The planning department and/or the architect appointed by us provide us with the structural design of the project as well as the estimates of the requirements for manpower, materials, machinery. The external consultants may continue to advise us during the course of the project.

Once the design and the estimates for the project have been finalized, we set up a project team under the supervision of the person in-charge of the project who is the central coordinating person who reports to the senior management of our Company. The purchase of materials is centralized and is based on the estimates given by the planning division or the architect, as the case may be.

For our projects, we enter into service/supply orders. We are not dependent on any single contractor/builder/supplier for our construction activities. The orders are placed by us either on the basis of one-to-one negotiations or on a tender and competitive bidding process.

We ensure that the raw material requirements of each project are satisfied in a timely and cost effective manner. We ensure that raw materials and other goods and services sourced from third party vendors are delivered in a timely manner, payment is made to suppliers in a timely manner, scrap on project sites is effectively disposed and also to develop relationships with vendors.

We conduct regular site visits and have developed a system of internal reporting for monitoring of the status and stage of all the projects being developed by us at any given point of time through a monthly information system. This ensures that we minimize time and cost overruns. We deploy representatives of our head office at the sites of our projects. Their main scope is to look after the issues related to manpower planning, including welfare of the workers, as well as security and administration of the site. These representatives travel from site to site in order to oversee such issues. Additionally, one representative from our human resources department visits each site on a fortnightly basis to address issues related to statutory compliances and other general issues related to the workers.

### **Sales and Marketing**

We use a mix of sales and marketing strategies to market our various projects in India and abroad depending on whether the project is a residential or commercial project.

A substantial majority of our sales are from customers in India, where we employ a dual approach of direct sales and channel sales.

- **Direct Sales:** We maintain a data base of our existing customers who become our prospects for our future projects. Our direct sales team interacts closely with the customers and closes the sales. We also use the route of telephonic and electronic marketing from our Head Office in Delhi and local offices in 11 different locations.
- **Channel Sales:** We have a network of approximately 800 associates and dealers across India who are our channel partners and help us market our various projects.

The sales team's compensation is based on the achievement of targets assigned to them and they earn incentives on the achievement of targets. The commercial and retail projects are mainly sold through property consultants whereas the commercial properties are leased out to key retailers for a fixed period of time. The sale or the capitalization of leased area in commercial projects is mainly done through our collaboration partners and property consultants.

We have relationships with various banks and housing finance institutions that provide credit facility to our customers. We also sell our projects to the Non Resident Indians (NRIs) based in United States, Canada, the Middle-East and the south-east Asia. We actively participate in real estate seminars and exhibitions organized in these countries which are attended by the NRI population. We have approximately 20 sales associates based out of these countries who market our various projects:

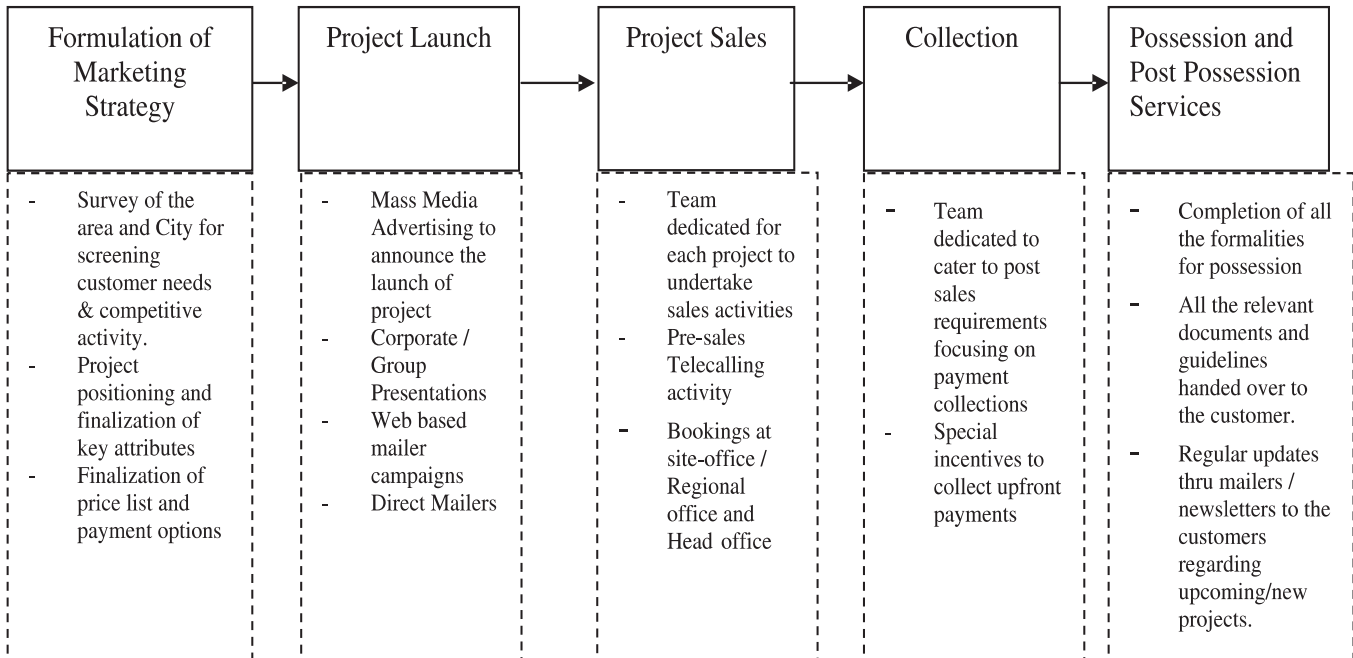

Once we have finalized the plans for a project and have identified the suitable location for a project, our project and the marketing team collate and analyze the required data on the relevant data required for marketing the project and the launch the project using the data so collated. A project launch event is organized for prospective and existing customers, channel partners and property consultants. This is accompanied with a mass media advertising campaign. Direct communication is made with the prospective customers, through advertising campaigns and collaterals. Banner advertising on National and International websites is done to create awareness about the project.

## OMAXE LIMITED

Customers book their units at the head office or the branch offices. This is followed with a formal buyer agreement. Loan facilitation is done through leading banks.

We have established 'Omaxe Care' a dedicated 24/7 helpline for our customers. We were one of the first real estate developers to provide this service which is a one-point interface with our customers in relation to any of their specific requirements, queries or grievances. For our- post Sales interactions, a customer team interacts with the customer to service their specific needs and also to collect any payments that may be due.

### Completion and handover of the project

We transfer the title or lease hold rights as the case may be to the customer. We ensure that the entire consideration is paid to us prior to the transfer of title or possession is handed over, except in the case of the lease agreements where the possession is handed over to the customers as per the terms of the lease agreement.

### EMPLOYEES

As of May 31, 2007, we had approximately 1,093 employees on rolls, including more than 300 professionals and about 700 non-professionals. We do not count any manpower employed by our sub-contractors as our employees. We expect that with the growth of our business, human resources and employee recruitment activities will increase.

We believe that our employees are key contributors to our business success. To achieve this, we focus on hiring and retaining the best talents in the industry. We make serious efforts to impart training and development to newly hired professionals and view this process as a necessary tool to maximizing performance of employees. ### **COMPETITION**

The real estate development industry in India, while fragmented, is highly competitive. We expect to face competition from large domestic as well as international property development and construction companies as a consequence of, among other things, the relaxation of the FDI policy for the real estate sector, rising government expenditures on infrastructure and various policy initiatives for the development of SEZs.

Our competitors include real estate developers such as DLF Limited, Ansal Group and Unitech Limited. We also expect to face competition in our new businesses from, among others, established construction firms, hotel companies, and various other business groups.

### **INTELLECTUAL PROPERTY**

We have initiated efforts to obtain the trademark and trade names in relation to some of the projects that we have started. We filed an application with the relevant governmental authority to register the 'Wedding Malls' trademark. Our Chairman and Managing Director, Mr. Rohtas Goel has registered trademarks over the name "Omaxe" and has licensed the use of the same to us by way of a trademark license agreement dated October 1, 2005. Although we have a license over the name "Omaxe", we do not have a registered trademark over our name and consequently do not enjoy the statutory protections accorded to a registered trademark. For more information, see Risk Factors on page xi of this Prospectus.

### **INFORMATION TECHNOLOGY**

## REGULATIONS AND POLICIES IN INDIA

Our Company is involved in the real estate development businesses. Since our real estate business involves the acquisition of land in several states, we are governed by a number of central and state legislation regulating substantive and procedural aspects of the acquisition of, and transfer of land. Additionally, our projects require, at various stages, the sanction of the concerned authorities under the relevant state legislation and local bye-laws.

While the real estate development industry remains largely unregulated, we are subject to land acquisition, town planning and social security laws. The following discussion details the important laws and regulations, which govern the real estate development sector.

### **CENTRAL LAWS:**

#### **Laws relating to land acquisition and land use**

The Urban Land (Ceiling & Regulation) Act, 1976 prescribes the limits to urban areas that can be acquired by an entity. It has been repealed in some states and union territories under the Urban Land (Ceiling & Regulation) Repeal Act, 1999, but it remains in operation in the other states. Further, land holdings are subject to the Land Acquisition Act, 1894, which provides for the compulsory acquisition of land by the appropriate government for purposes categorized as “public purpose”, including planned development and town and rural planning. However, any person having an interest in such land has the right to object and the right to compensation.

#### **Laws regulating transfer of property:**

##### ***Transfer of Property Act, 1882***

The transfer of property, including immovable property, between living persons, as opposed to the transfer of property by the operation of law, is governed by the Transfer of Property Act, 1882 (“T.P. Act”). The T.P. Act establishes the general principles relating to the transfer of property including among other things identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property.

##### ***Registration Act, 1908***

The Registration Act, 1908 (“Registration Act”) has been enacted with the object of providing public notice of the execution of documents affecting a transfer of interest in immovable property. The purpose of the Registration Act is the conservation of evidence, assurances, title, publication of documents and prevention of fraud. It details the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent. An unregistered document will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the T.P. Act or as collateral), unless it has been registered.

##### ***The Indian Stamp Act, 1899***

There is a direct link between the Registration Act and the Indian Stamp Act, 1899 (“Stamp Act”). Stamp duty needs to be paid on all documents, which are registered, and the rate varies from state to state. The Stamp Act provides for the imposition of stamp duty at the specified rates on instruments listed in Schedule I of the said Act. The applicable rates for stamp duty on these instruments, including those relating to conveyance, are prescribed by state legislation. Instruments chargeable to duty under the Stamp Act, which are not duly stamped, are incapable of being admitted in court as evidence of the transaction contained therein.

##### ***The Easements Act, 1882***

The law relating to easements is governed by the Easements Act, 1882 (“Easements Act”). The right of easement is derived from the ownership of property and has been defined under the Easements Act to mean a right which the owner or occupier of land possesses for the beneficial enjoyment of that land and which permits him to do or to prevent something from being done in respect of certain other land not his own. Under this law an easement may be acquired by the owner of immovable property, i.e. the dominant owner, or on his behalf by the person in possession of the property. Such a right may also arise out of necessity or by virtue of a local custom.

### Laws relating to Employment

The employment of construction workers is regulated by a wide variety of generally applicable labour laws, including the Contract Labour (Regulation and Abolition) Act, 1970, the Minimum Wages Act, 1948, the Payment of Bonus Act, 1965, the Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 and the Payment of Wages Act, 1936.

### Special Economic Zones Act, 2005 (“SEZ Act”)

The SEZ Act which was notified February 10, 2006, provides for establishment, development and management of SEZ’s with the objective inter alia for the generation of additional economic activity, promotion of exports of goods and services, promotion of domestic and foreign investment and development of infrastructure facilities. The SEZ Act provides that the GoI, any State Government or any person may, either jointly or severally, establish a SEZ in accordance with the procedure under the SEZ Act.

Any person who intends to set up a SEZ, after identification of the area, is required to make an application to the concerned state government or the board of approval constituted under the SEZ Act (“Board”) for approval of the same. The application is required to contain certain prescribed particulars including the location and area of the proposed SEZ with details of the existing or proposed infrastructure. In case the application is made to the state government, it may forward the same together with its recommendations to the Board. In the event the application is made directly to the Board, it may grant the approval, which shall be subject to concurrence of the concerned state government. Once the Board has approved the proposal, it is required to communicate the same to the GoI, which shall grant a letter of approval upon such terms, conditions and entitlements as may be approved by the Board.

The GoI has prescribed the minimum area requirements stipulated for various categories of SEZs, which are as follows:

- Multi-product SEZs: 1,000 hectares or more.
- Services-sector SEZs: 100 hectares or more.
- Sector-specific SEZs such as gems and jewellery, information technology, biotechnology: 10 hectares or more.
- All other sectors: 100 hectares or more.

However, for certain states, the area requirement for multi-product SEZs and sector specific SEZs has been relaxed to 200 hectares and 50 hectares respectively.

The functioning of SEZs is governed by a three-tier administrative set-up: (i) an Inter-Ministerial Committee i.e. the Board, which is the apex body (ii) the Unit Approval Committee, at the zonal level committee, which deals with approving units in SEZs and other related issues (iii) Development Commissioner in relation to each SEZ.

### STATE LAWS:

#### Urban Development Laws

State legislations provide for the planned development of urban areas and the establishment of regional and local development authorities charged with the responsibility of planning and development of urban areas within their jurisdiction. Real estate projects have to be planned and developed in conformity with the norms established in these laws and regulations made thereunder and require sanctions from the government departments and developmental authorities at various stages. For instance in certain states such as Haryana, a group housing license is required for development of a set of residential structures. Where projects are undertaken on lands, which form part of the approved layout plans and/or fall within municipal limits of a town, generally the building plans of the projects have to be approved from concerned municipal or developmental authority. Building plans are required to be approved for individual buildings. Clearances with respect to other aspects of development such as fire, civil aviation and pollution control are required from appropriate authorities, depending on the nature, size and height of the projects. The approvals granted by the authorities generally prescribe a time limit for completion of the projects. These time limits are renewable upon payment of a prescribed fee. The regulations provide for obtaining a completion/occupancy certificate upon completion of the project. Under the state industrial policy, 2003, the Government of Punjab has devised a special package of incentives by way of relaxation of rules and regulations for new as well as existing industrial units undertaking expansion for projects developing township and multiplexes. The incentives are applicable only if a specified amount of capital investment, as decided by the Government of Punjab, is made within specified time limits.

#### Agricultural development laws

The acquisition of land is regulated by state land reform laws, which prescribe limits up to which an entity may acquire agricultural land. Any transfer of land that results in the aggregate land holdings of the acquirer in the state to exceed this ceiling is void, and the surplus land is deemed, from the date of the transfer, to have been vested in the state government free

of all encumbrances. When local authorities declare certain agricultural areas as earmarked for townships, lands are acquired by different entities. After obtaining a conversion certificate from the appropriate authority with respect to a change in use of the land from agricultural to non-agricultural for development into townships, commercial complexes etc. such ceilings are not applicable. While granting licenses for development of townships, the authorities generally levy development/external development charges for provision of peripheral services. Such licenses require approvals of layout plans for development and building plans for construction activities.

The licenses are transferable on permission of the appropriate authority. Similar to urban development laws, approvals of the layout plans and building plans, if applicable, need to be obtained.

#### **Regulations regarding foreign investment:**

The Government of India has permitted foreign direct investment (“FDI”) of up to 100% under the automatic route in townships, housing, built-up infrastructure and construction-development projects (which would include, but not be restricted to, housing, commercial premises, hotels, resorts, hospitals, educational institutions, recreational facilities, city and regional level infrastructure), (“Real Estate Sector”), subject to certain conditions enumerated in Press Note No. 2 (2005 series). A short summary of the conditions is as follows:

- (a) Minimum land area to be developed is 10 hectares in case of serviced housing plots and built-up area of 50,000 square meters in case of construction development projects. Where the development is a combination project, any one of the two conditions would suffice.
- (b) Minimum capitalization of US\$10 million for wholly owned subsidiary and US\$5 million for a joint venture has been specified and it is required to be brought in within six months of commencement of business of the company.
- (c) Further, the original investment is not permitted to be repatriated before three years from completion of minimum capitalization except with prior approval from FIPB.
- (d) At least 50% of the project is required to be developed within five years of obtaining all statutory clearances and the responsibility for obtaining it is cast on the foreign investor. Further, the sale of undeveloped plots is prohibited.

For the purpose of this clause “undeveloped plots” have been defined to mean those plots where roads, water supply, street lighting, drainage, sewerage, and other conveniences, as applicable under prescribed regulations, have not been made available. It is necessary that the investor provides this infrastructure and obtains the completion certificate from the concerned local body/service agency before he is allowed to dispose of serviced housing plots.

- (e) Compliance with rules, regulations and bye-laws of state government, including land use requirements and provision of community amenities and common facilities, municipal and local body has been mandated and the investor is given the responsibility for obtaining all necessary approvals.

The Department of Industrial Policy and Promotion, Ministry of Commerce, GoI, by way of a letter dated December, 26, 2006 has confirmed that investment by FIIs registered with SEBI in the Equity Shares offered as part of this Issue would not fall within the ambit of Press Note 2(2005 Series) issued by the GoI and will therefore not be subject to the conditions specified therein.

Consolidation & Investment in Joint Venture	<p>In accordance with AS-27, "Financial reporting of Interest in joint ventures", the venturer recognizes in its financial statements its share of jointly controlled assets, any liability it has incurred, its share of any liability incurred jointly with other venturers in relation to the joint venture, any income from sale or use of its share of output of the joint venture, together with its share of expenses incurred by joint venture and any expenses which it has incurred in respect of interest in joint venture.</p>	<p>Investment in Joint Ventures is generally accounted for under the equity method of accounting.</p>	<p>Both the proportional consolidation and equity methods are permitted. An exception to the use of the proportional consolidation method is where an interest in a jointly controlled entity is acquired and held exclusively with a view to its subsequent disposal within 12 months of acquisition.</p>

13.	Real Estate Sale	<p>Guidance note recently issued by the ICAI on "Recognition of revenue for Real Estate Developers, recommends the principles while recognizing the income arising from real estate sales. Guidance note recommends the recognition of Revenue once the seller has transferred to the buyer all significant risks and rewards of ownership and the seller retains no effective control of the real estate to a degree usually associated with ownership, no significant uncertainty exists regarding the amount of consideration that will be derived and it is not unreasonable to expect ultimate collection. For real estate sales other than retail land sales, US GAAP, provides for profit recognition by the full accrual and several other methods, depending on whether a sale has been consummated, the extent of the buyer's investment in the property being sold, whether the seller's receivable is subject to future subordination, and the degree of the seller's continuing involvement with the property after the sale.	
14.	Construction Contract	AS-7 governs the principles of accounting in respect of a construction contract. The provisions are similar to IFRS.	Guidance is defined from the perspective of the Contractor rather than the contract. Scope is not limited to Construction type contracts. Guidance is also applicable to unit price and time and materials contract. The percentage completion method is preferred. The completed contract method can be used in rare circumstances when the extent of progress towards completion is not reasonably measurable. Revenue approach/Gross profit approach are recommended.	When the outcome of a construction contract can be estimated reliably, contract revenue and contract costs are recognized as revenue and expenses respectively by reference to the stage of completion of the contract activity (i.e. percentage completion method). The outcome can be estimated reliably when the contract revenue, contract costs to date and to completion and the stage of completion can be measured reliably. Any expected loss on a construction contract is recognized as an expense immediately.
15.	Employee Benefit-Defined benefit plan	Liability for defined benefit plans is accrued based on an actuarial valuation. Revised AS-15 effective from accounting period commencing on or after 7.12.2006,, requires defined benefit retirement plans to be reported at the present value of the defined benefit obligations and the current service cost using the projected unit credit method. Revised AS-15 is similar to IFRS although several differences in detail e.g. actuarial gains and losses are recognized upfront in the Profit and Loss Account.	Projected unit credit method is used to determine benefit obligation and record plan assets at fair value. Actuarial gains and losses can be deferred but with several areas of differences in the detailed application. 16.	Employees Share Compensation	Applicable and mandatory only to listed companies. ESOPs granted to employees are accounted as per the Guidance Note issued by the ICAI and the Employee Stock Purchase Scheme guidelines 1999 issued by SEBI. ESOPs are accounted either using the Intrinsic value method of the fair value method.	Expenses for share based employee compensation or services purchased is recognized. Corresponding amount is recorded either as a liability or an increase in equity, depending on whether transaction is determined to be cash or equity-settled. Amount to be recorded is measured at fair value of shares or share options granted. Compensation expense is generally recognized based on fair value of awards at grant date. Several areas of difference exist in application.	Expenses for shared based employee compensation or services purchased is recognized at fair value. Corresponding amount is recorded either as a liability or an increase in equity, depending on whether transaction is determined to be cash or equity-settled. Amount to be recorded is measured at fair value of shares or share options granted
17.	Depreciation & Amortization	Depreciation is recorded over the asset's useful life. Schedule XIV of the Companies Act, 1956 prescribes minimum rates of depreciation and typically companies use these as the basis for the useful life of the asset.	The depreciable amount of an item of Property, Plant and Equipment is allocated on a systematic basis over its useful life, reflecting the pattern in which the entity consumes the asset's benefits.	The depreciable amount of an item of PPE is allocated on a systematic basis over its useful life, reflecting the pattern in which the entity consumes the asset's benefits.
18.	Inventory	Inventory is valued at cost or net realizable value, whichever is lower. Reversal is required for a subsequent increase in value of inventory previously written down.	Inventory is valued at lower of cost or market price. Market value is defined as current replacement cost subject to an upper limit of net realizable value and a lower limit of net realizable value less a normal profit margin. Reversal of a write down is prohibited, as a write down creates a new cost basis.	Carry at lower of cost and net realisable value. Use FIFO or weighted average method to determine cost. LIFO prohibited. Reversal is required for subsequent increase in value of previous write-downs.
19.	Business Combination	Recognizes both "Pooling of interest" as well as Purchase method	Recognizes only the "Purchase Method" for accounting business combinations	Business combinations are accounted by the Purchase method. "Pooling of interest" is prohibited under IFRS.
20.	Deferred Revenue Expenditure	Under Indian GAAP, after the issuance of AS 26- Intangible Assets, no such deferred revenue expenses should not be recognized except for certain items which are excluded from the scope of the Standard. The balances for these items on the date of adoption of AS 26 should continue to be expensed over the number of years originally contemplated.	Charge off, unless deferment permitted by specific literature. For example, SOP 93-7 permits deferment of cost of direct response advertising	Expensed under IAS 38. Even advertising costs need to be expensed as incurred even though the expenditure incurred may provide future economic benefits.

21.	Impairment of Asset	AS 28, "Impairment of Assets" requires an enterprise to assess on each Balance Sheet date whether there is any indication that an asset is impaired. If such an indication exists, the assets must be written down to higher of net selling price and the value in use based on discounted cash flows. This reduction is an impairment loss.	For assets to be held and used, impairment review based on undiscounted cash flows. If the undiscounted cash flows are less than the carrying amount, measure the impairment loss using market value or discounted cash flows. Impairment loss is recorded in the Income Statement. Reversals of impairment losses are prohibited.	If impairment is indicated, write down assets to recoverable amount which is the higher of net selling price and value in use based on discounted cash flows. If no loss arises, reconsider useful lives of those assets. Impairment loss is recorded in the Income Statement. Reversal of loss is permitted in certain cases.
22.	Deferred Taxation	Deferred tax assets arising due to unabsorbed depreciation or carry forward of losses are recognized only to the extent that there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realized. The tax rate applied on deferred tax items is the substantively enacted tax rate.	Deferred tax assets and liabilities are recorded for the tax effect of all temporary differences between the tax and book bases of assets and liabilities and operating loss carry-forwards. A valuation allowance is made against deferred taxes, if on the basis of available evidence, it is more likely than not that some portion or all of the deferred tax asset will not be realized. The tax rate applied on deferred tax items is the enacted tax rate.	Use full provision method (some exceptions), driven by Balance Sheet temporary differences. Recognize deferred tax assets if recovery is probable. Deferred tax assets and liabilities are measured using tax rates that have been enacted or substantively enacted by the Balance Sheet date.
23.	Dividend	Dividends are recorded as provisions when proposed.	Dividends are recorded as liabilities when declared.	Dividends are recorded as liabilities when declared.
24.	Investment in Property	Consider as long-term investment and carry at cost less impairment.	No specific rules for Investment property. These are treated the same as other properties (depreciated cost).	Measure at fair value or at depreciated cost. Recognize changes in fair value in the income. In case cost method is used, fair value information must be disclosed.
25.	Fringe Benefit Tax	Fringe Benefits Tax should be disclosed as a separate item after determining profit before tax on the face of the Profit and Loss Account for the period in which the related fringe benefits are recognized	Fringe Benefits Tax is included as part of the related expense (fringe benefit) which gives rise to incurrence of the tax. The nature and extent of any transactions with all related parties and the nature of the relationship must be disclosed, together with the amounts involved. Unlike IFRS, all material related party transactions (other than compensation arrangements, expense allowances and similar items) must be disclosed in the separate financial statements of wholly-owned subsidiaries, unless these are presented in the same financial report that includes the parent's consolidated financial statements (including those subsidiaries).	There is no specific requirement in IFRS to disclose the name of the related party (other than the ultimate parent entity). There is a requirement to disclose the amounts involved in a transaction, as well as the balances for each major category of related parties. However, these disclosures could be required in order to present meaningfully the "elements" of the transaction, which is a disclosure requirement.
27.	Post Balance Sheet Event	Adjust the financial statements for subsequent events, providing evidence of conditions at Balance Sheet date and materially affecting amounts in financial statements (adjusting events). Disclosing non-adjusting events. However, non-adjusting events are not required to be disclosed in financial statements but are disclosed in report of approving authority e.g. Directors' Report. Unless otherwise stated, the financial information used in this section is derived from our consolidated financial statements as restated. Our Fiscal ends on March 31 of each year. Accordingly, all references to a particular Fiscal are to the twelve-month period ended March 31 of that year.*

#### Overview

We are a real estate development and construction company with operations in 30 cities and 9 States in India. We are involved in residential and commercial real estate development projects ranging from integrated townships, group housing and retail and other commercial properties, hotels, information technology and bio-tech parks. Our operations span across all aspects of real estate development, from the identification and acquisition of land, to the planning, execution and marketing of our projects.

We commenced business in 1989 as a construction and contracting company, and as of March 31, 2007, we have completed more than 120 construction projects in such capacity. In 2001, we diversified into the real estate development business with a focus on residential and commercial properties. As of March 31, 2007 we have completed 8 residential projects, consisting of 7 group housing and 1 integrated township project and 2 commercial projects, including retail and office space, covering approximately 5.13 million sq. ft of built-up/ developed area. We have diversified our project portfolio by undertaking projects for the development of hotels, information technology and bio-tech parks.

As of March 31, 2007, we had access to land reserves of approximately 3,255 acres (including approximately 571 acres of land belonging to joint ventures and collaborations in respect of which our economic interest is approximately 74% calculated on a weighted average basis in relation to such land), of which approximately 3,096 acres (including approximately 451 acres of land belonging to our joint ventures and collaborations) relate to projects that are currently under development or under various stages of approval for development, representing approximately 150 million sq. ft. of saleable area, and approximately 159 acres (including approximately 120 acres belonging to our joint ventures and collaborations) relate to our future projects and projects that are currently in various phases of planning.

Our total income have grown from Rs. 1,455.56 million in Fiscal 2003 to Rs. 14,396.79 million in Fiscal 2007, at a CAGR of 77.34% and our profit after tax and minority interest increased from Rs. 47.67 million in Fiscal 2003 to Rs. 2,572.61 million in Fiscal 2007, at a CAGR of 171.04%. The year over year change in our total income over its immediately preceding year has been Rs. 6,198.17 million (75.60%), Rs. 4,232.63 million (106.72%), Rs. 1,128.74 (39.78%) and Rs. 1,381.69 million (94.92)% for Fiscal 2007, 2006, 2005 and 2004, respectively. The year over year change in our net profit after tax and minority interest over its immediately preceding year has been Rs. 1,384.46 million (116.52%), Rs. 1,137.79 million (2259.31%), Rs. (33.12 million) (-39.67%) and Rs. 35.81 million (75.12%) for Fiscal 2007, 2006, 2005 and 2004, respectively.

We operate in two business divisions: (a) real estate development division and (b) construction of projects on a contractual basis.

#### Income

Our total income comprises of income from operations, which includes:

- income from real estate development projects;
- income from construction of projects on a contractual basis; and
- income from other sources.

### **Real estate development business**

We are in the business of development of residential and commercial projects owned by us or for which we have development rights. Our total income is contributed by the residential and commercial business. Our income from residential and commercial business as a percentage of real estate revenue from sale of properties (excluding ancillary income) is as below:

	Year ended			
	March 31, 2007	March 31, 2006	March 31, 2005	March 31, 2004
Residential Business	87.50%	90.19%	83.52%	96.10%
Commercial Business	12.50%	9.81%	16.48%	3.90%

Currently, we generate income from the sale of residential plots, individual houses, group housing units, shopping and commercial complexes.

We account for income from sale of constructed properties using the “percentage completion” method. Under this method revenue is recognized, in relation to the sold areas only, on the basis of the percentage of the actual cost incurred thereon (including land) as against the total estimated cost of the project under execution. However, if the actual project cost incurred is less than 30% of the total estimated project cost, no cost or income is recognized in respect of that project in the relevant fiscal period. Estimates of saleable area and the related income as well as project costs are reviewed periodically. The effect of any changes to estimates is recognised in the financial statements for the period in which such changes are determined.

The percentage completion method requires us to identify which development, or which component in a particular development, is to be treated as a separate project. This provides us with considerable flexibility as to how we are going to treat a particular development and divide it into individual projects. Once we have defined a project, we generally will not change the definition of the project. We estimate the income from a project based on its size, specifications, location, estimated saleable area, estimated project cost and time for completion, among other things. We typically enter into contracts with our customers while the project is still under development. Customers wishing to buy a property in a project are required to make an initial payment at the time of booking and pay the remaining purchase price either in full or in instalments over the period between the date of booking and the date on which the property is to be transferred. Accordingly, bookings of saleable area and project cost incurred, rather than actual amounts received, determine revenue recognition under the percentage completion method. Our estimates of the saleable area in a project are subject to change depending on the nature of the approvals we receive for these projects and other economic considerations.

We estimate the total cost of a project, based on similar considerations, prior to its commencement. Our project planning and execution teams have extensive experience of prior projects, which enables them to estimate and monitor project costs. Our project execution teams re-evaluate project costs periodically, particularly when in their opinion there have been significant changes in market conditions, costs of labour and materials and other contingencies. Material re-evaluations will affect our income in the relevant Fiscal periods.

The major source of our future revenue would be our ongoing and forthcoming projects, which are described in the section titled “Our Business” on page 55.

As part of the growth and diversification of our business, we have recently entered into the development of hotels, information technology and bio-tech parks, and special economic zones.

In Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, income from our real estate development business represented 98.52%, 91.68%, 62.83% and 55.78%, respectively, of our total income.

### **Construction and contracting business**

Historically, our focus was in the constructing and contracting business but we diversified our focus in 2001 to the real estate development business. In Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, income from our construction and contracting business represented 0.89%, 7.65%, 36.89% and 44.13%, respectively, of our total income. Income from execution of contracts undertaken is recognized on the basis of certification issued by the client. We expect to continue to focus on our real estate development business. We have not entered into any new projects in the construction and contracting division since March 31, 2006

### **Other Income**

Other income includes income from, among other things, interest earned from securities / bank deposits and dividends on investments. Some of these incomes are recurring in nature. The total income from such other sources for Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004 was Rs. 83.81 million, Rs. 55.23 million, Rs. 11.28 million and Rs. 2.34 million, respectively, which was 0.58%, 0.67%, 0.28% and 0.08% of our total income in such respective periods.

### *Expenditure*

We account for all expenses incurred for a specific project as “operating cost” for such project. All expenses which are incurred and which are not specific to a particular project are accounted for separately as employee cost, administrative cost, selling cost, depreciation and finance cost and are not included in operating expenses. Our total expenditure comprises of operating cost, employee cost, administrative cost, selling cost, finance cost and depreciation.

#### *Operating cost*

Operating cost consists of the cost of acquisition of land and the cost of acquisition of development rights, cost of building materials, cost of services of architects, contract labour, salary and allowances of employees assigned to the projects, rents and taxes, administrative costs, insurance, depreciation, advertising and marketing expenses for specific projects, selling expenses such as brokerage payable to booking agents for specific projects, and finance charges incurred for the projects.

#### *Employee Cost*

Our employee cost comprises of salaries, wages, allowances and bonus paid to employees, contribution to employee provident funds and other staff welfare expenses that are not specifically allocated to any project. The employee cost allocated to a specific project is included in the operating cost for such project. We had 1,084, 794, 542, and 393 employees as of March 31, 2007, 2006, 2005 and 2004, respectively.

#### *Administrative cost*

Our administrative cost relates to expenses incurred for general administration that are not assignable to any specific project. These include, among other things, directors’ remuneration (including cost of employee stock options), repairs and maintenance not attributable to a project, royalty expenses under the trademark license agreement, electricity charges, travel expenses and cost of maintaining vehicles, legal and professional fees, provision for bad debt and other miscellaneous expenses that are not specific to a particular project.

#### *Selling Cost*

Our selling cost relates to the cost of business promotion and the cost of advertisement and publicity for our projects that are not attributable to any specific project.

#### *Finance cost*

The finance charges incurred by us include interest charges payable by us on the deposits received by us under a fixed deposit scheme and for short term and long term loans including working capital loans, interest charges on loans for purchase of certain equipment and vehicles and financial charges like processing fees for loans, bank guarantees not attributable to a specific project.

#### *Depreciation*

This includes depreciation on building, plant and machinery, furniture, fixtures, motor vehicles and computers. Depreciation on fixed assets is provided on written down value method in the manner and rates prescribed in Schedule XIV to the Companies Act, except in the case of steel shuttering and scaffolding material, which is treated as part of plant and machinery, where the estimated useful life, based on technical evaluation, has been determined as five years.

#### *Taxation*

Income taxes are accounted for in accordance with AS-22 issued by the ICAI on “Accounting for Taxes on Income”. Taxes comprise current tax, deferred tax and fringe benefit tax.

Provision for current taxes is made at current tax rates after taking into consideration the benefits admissible under the provisions of the Income Tax Act, 1961. The major benefit we take advantage of is under Section 80-IB of the Income Tax Act, 1961 as some of our residential housing projects meet the criteria including size prescribed by the statute. For details of the tax benefits available to us, see, the section titled “Statement of Tax Benefits” on page 43.

Deferred taxes arise from timing differences between our book profits and our taxable profits that originate during an accounting period and which can be reversed in subsequent periods. Deferred taxes are measured using the tax rates and laws that have been enacted as of the date of financial statements in which they are recorded. We provide for deferred tax liability/assets on such timing differences subject to prudent considerations. Significant sources of deferred tax liabilities and assets include: (a) the timing difference in recording depreciation under Indian GAAP and under the Income Tax Act, 1961 and (b) the expenses admissible under the provisions of the Income Tax Act, 1961 on payment basis.

## Factors Affecting Results of Operations

*General economic and demographic condition in India:* All our operations are currently located in India and the economic condition of India has a direct impact on our income. We believe that the success of our projects is dependent on the general economic growth of India. For example, in Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, when our total income increased by 75.60%, 106.72%, 39.78% and 94.92% respectively, as compared to the previous periods, the GDP of India registered a growth of 9.2%, 9.0%, 7.5% and 8.5%, respectively. (Source: Union Budget & Economic Survey, Ministry of Finance, GOI)

For details of the growth of the Indian economy, see the section titled “Industry Overview” on page 49.

*Government policies including taxes and duties affecting infrastructure:* The provisions of section 80-IB of the Income Tax Act provide for exemption on payment of income tax on residential projects approved before March 31, 2007, provided that the built up area of each dwelling unit is not more than 1,000 square feet within a radius of 25 kilometres of the metropolitan cities of New Delhi and Mumbai and 1,500 square feet in rest of India. Our projects are customized, wherever feasible, to take advantage of the benefits provided by these provisions of the I.T. Act. The total amount of benefit derived by us under section 80-IB of the I.T. Act was Rs. 471.58 million and Rs. 265.88 million in Fiscal 2007 and Fiscal 2006, respectively, which was 14.63% and 18.12% of our profit before tax, respectively. We did not derive any such benefit in Fiscal 2005 and Fiscal 2004. For details of these provisions of the I.T. Act, please see “Statement of Tax Benefits” on page 43.

In addition, a major factor affecting the growth of residential housing property is income tax benefits on housing loans. Currently, income tax deduction is available on the interest component up to Rs. 0.15 million on housing loans and rebate of up to Rs. 0.10 million on the principal repayment.

*Supply of land:* Our operations are dependent on the availability of land for our projects. Our growth is linked to the availability of land in areas where we can develop projects that are marketable mainly to the mid income to higher income groups. Any government regulations that restrict the acquisition of land or increased competition for land may therefore adversely affect our operations. The cost of acquisition of land which includes the amounts paid for freehold rights, leasehold rights and cost of registration and stamp duty represents a substantial part of our project expenditure. Excess supply of land will lower the cost of the land and therefore lower the market value of our projects.

*Availability of financing for customers:* Residential properties, which include plots for residences, group housing projects and built up houses, accounted for Rs. 12,229.30 million, Rs. 6,715.85 million, Rs. 2,057.10 million and Rs. 1,516.27 million in Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, respectively, which was 85.44%, 82.47%, 52.02% and 53.49% of our total income from operations for these periods.

One of the significant drivers behind the growth of demand for housing units is interest rate on housing loans. The interest rate has substantially reduced from the last decade. However, the rates of interest for housing loans have been recently increased by most of the lending financial institutions and banks.

*Cost of acquisition of land:* The cost of acquisition of land which includes the amounts paid for freehold rights, leasehold rights and cost of registration, stamp duty and all other related costs was Rs. 10,411.57 million, Rs. 10,535.41 million, Rs. 839.43 million and Rs. 1,896.46 million in Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, respectively. We acquire lands from governmental or development authorities and private parties. The lands we acquire from governmental or development authorities are generally through a tender process, wherein the highest bidder is selected for allotment of land, which are in some cases subject to qualification under technical or financial parameters. In certain cases, the governmental authorities fix a reserve price for the land and all bids below this price are rejected. We are typically required to enter into a deed of conveyance or a lease deed transferring title or leasehold rights in our favour. The registration charges and stamp duty among other things are also payable by us.

We acquire the right to develop properties through collaboration with other entities. These other entities are title holders of lands. Typically, the project is conceived and developed by us. The other party is typically given the option, as consideration, to either share the sale proceeds in a pre determined proportion depending upon the nature of the project and the location of the land or to receive a pre determined percentage of the developed area which the other entity may market at such entity's cost and expense.

*Cost of construction:* The cost of construction primarily comprise of cost of steel, cost of cement, cost of wood, cost of flooring materials and cost of other accessories. In many instances, we enter into fixed price contracts with our suppliers and contractors where some or all of the costs of construction are outsourced to the contracting party and therefore, the cost of construction is included in the contract price. We have increased the number of fixed price contracts that we enter into in the last 3 years of our operations.

*Cost of steel:* Steel is an important component in the construction of buildings and the cost of steel comprised 8.61%, 13.12%, 11.74% and 4.95% of our total cost of construction in Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, respectively.

---

*Cost of cement:* Cement is an important component in the construction of buildings and the cost of cement comprised 0.22%, 0.47%, 0.94% and 0.63% of our total cost of construction in Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, respectively. The price of cement varies across regions due to variations in the demand supply balance, the level of concentration and demand growth.

*Cost of timber:* Timber is an important component in the construction of buildings and the cost of timber comprised 0.01%, 0.10%, 0.26% and 1.49% of our total cost of construction in Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, respectively.

*Cost of personnel or labour:* The cost of personnel used in a specific project is assigned to the cost of construction and development and was 3.72%, 6.51%, 4.37% and 4.51% of our total cost of construction in Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, respectively.

*Marketing Expenses:* The marketing expenses used in a specific project is assigned to the cost of construction and development and was 6.70%, 2.82%, 3.87% and 2.96% of our total cost of construction in Fiscal 2007, Fiscal 2006, Fiscal 2005 and Fiscal 2004, respectively.

*Taxation:* The other primary factor which affects our financial condition is the tax payable by us. However, in case our liability for current taxes as calculated is less than 10% of our book profit (as defined by statute), we are liable to pay the Minimum Alternate Tax, or MAT, in accordance with Section 115JB of the Income Tax Act, 1961. Deferred taxes arise from timing differences between our book profits and our taxable profits that originate during an accounting period and which can be reversed in subsequent periods. Deferred taxes are measured using the tax rates and laws that have been substantively enacted as of the date of financial statements in which they are recorded. We provide for deferred tax liability/assets on such timing differences subject to prudent considerations. Significant sources of deferred tax liabilities and assets include: (a) the timing difference in recording depreciation under Indian GAAP and under the Income Tax Act, 1961 and (b) the expenses inadmissible under the provisions of the Income Tax Act, 1961. For details of the tax benefits available to us, see, the section titled "Statement of Tax Benefits" on page 43.

Other factors affecting our results of operations:

- regulations affecting the real estate industry;
- our ability to acquire suitable lands at reasonable costs;
- our ability to identify suitable projects and execute them in a timely and cost effective manner;
- the availability of finance on favourable terms for our business; and
- competition.

For more information on these and other factors/developments which have or may affect us, see "Risk Factors", "Our Industry" and "Our Business" on page xi, 49 and 55, respectively.

### **Critical Accounting Policies**

Preparation of financial statements in accordance with Indian GAAP, the applicable accounting standards issued by the ICAI and the relevant provisions of the Companies Act require our management to make judgments, estimates and assumptions regarding uncertainties that affect the reported amounts of our assets and liabilities, disclosures of contingent liabilities and the reported amounts of revenues and expenses. These judgments, assumptions and estimates are reflected in our accounting policies.

Certain of our accounting policies are particularly important to the portrayal of our financial position and results of operations and require the application of significant assumptions and estimates of our management. We refer to these accounting policies as our "critical accounting policies". Our management uses our historical experience and analyses, the terms of existing contracts, historical cost convention, industry trends, information provided by our agents and information available from other outside sources, as appropriate, when forming our assumptions and estimates. However, this task is inexact because our management is making assumptions and providing estimates on matters that are inherently uncertain. For more information on our significant accounting policies, please refer to "Financial Information" beginning on page 255.

The preparation of financial statements in conformity with the generally accepted accounting principles in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

While all aspects of our financial statements should be read and understood in assessing our current and expected financial condition and results, we believe that the following critical accounting policies warrant additional attention:

(a) **Revenue recognition**

1. We recognize revenue from our real estate projects on the 'Percentage of Completion Method' of accounting. Revenue comprises of aggregate amounts of sale price agreed with the customers and is recognized on the basis of percentage of actual costs incurred thereon, including land and total estimated construction and development cost of projects under execution, subject to such actual cost being 30 percent or more of the total estimated cost. The estimates of the projected revenue, projected profits, projected costs, cost to completion and the foreseeable loss are reviewed periodically by the management and any effect of changes in estimates is recognized in the period such changes are determined.
2. Interest due on delayed payments by customers is accounted on receipt basis due to uncertainty of recovery of the same.
3. Income from construction contracts is recognized by reference to the stage of completion of the contract activity as certified by the client. Revenue on account of contract variations, claims and incentives are recognized upon determination or settlement of the contract.

(b) **Impairment of assets**

We assess at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, we estimate the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belong is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the profit and loss account.

(c) **Inventories**

1. Building material and consumable stores are valued at cost, which is determined on the basis of the 'First in First out' method.
2. Land is valued at cost, which is determined on average method. Cost includes cost of acquisition and all related costs.
3. Construction work in progress is valued at cost. Cost includes cost of material, services and other related overheads related to project under construction.
4. Completed real estate project for sale is valued at lower of cost or net realizable value. Cost includes cost of materials, services and other related overheads.

(d) **Accounting for taxes on income**

1. Provision for current tax is made, based on the tax payable under the Income Tax Act, 1961.
2. Deferred tax on timing differences between taxable and accounting income is accounted for, using the tax rates and the tax laws enacted or substantially enacted as on the balance sheet date. Deferred tax assets on unabsorbed tax losses and unabsorbed depreciation are recognized only when there is a virtual certainty of their realization. Other deferred tax assets are recognized only when there is a reasonable certainty of their realization.

(e) **Borrowing costs**

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset (including real estate projects) are considered as part of the cost of the asset or the project. All other borrowing costs are treated as period cost and charged to the profit and loss account in the year in which incurred.

(f) **Projects in progress**

Projects in progress are valued at cost. Cost includes cost of land, materials, construction, services, borrowing costs and other overheads relating to projects.

### COMPARISON OF FISCAL 2007 AND FISCAL 2006

#### Income

Our total income comprising of operating income, income from associates and other income increased by 75.60% to Rs. 14,396.79 million in Fiscal 2007 from Rs. 8,198.62 million in Fiscal 2006. This was primarily due to an increase in the operating income from our real estate division to Rs. 14,184.28 million in Fiscal 2007 from Rs. 7,516.53 million in Fiscal 2006, partially offset by a decline in our operating income from our construction contracts to Rs. 128.57 million in Fiscal 2007 from Rs. 626.86 million in Fiscal 2006. The increase in our real estate division income was driven by an increase in the sale of our projects, including sales based on booking for Grand Woods at Noida, Sector MU at Greater Noida, Omaxe Connaught Place at Greater Noida, Omaxe Citadel at Delhi, Omaxe Height at Faridabad, Omaxe Height at Bahadurgarh, The Forest at Noida, The Nile at Gurgaon, Omaxe City at Sonapat, Jaipur, Lucknow, Palwal and Rohtak representing sale by us of 12.34 million square feet of area in Fiscal 2007 compared to 11.38 million square feet of area in Fiscal 2006, an increase of 8.43%. The net income from associates of Rs. 0.13 million in Fiscal 2007 relates to our share of profit.

In relation to our ongoing projects, we were able to recognize more income under the percentage completion method in Fiscal 2007 as compared to Fiscal 2006. In Fiscal 2007, we were able to recognize income from 23 projects, the average completion of which was 60.73% as compared to 57.96% from 13 projects in Fiscal 2006. This resulted in additional real estate income of Rs. 6,667.75 million.

In addition, the commencement and progress of construction of various residential and commercial projects in respect of which we have received significant early bookings and increase in unit prices also contributed to the increase in our operating income. We recognized revenue for 11 new projects under the percentage completion method that were added during Fiscal 2007 with an average percentage completion achieved of 49.57% and creating additional income of Rs. 10,196.70 million in Fiscal 2007.

Our income from construction contracts declined as a result of our decision to focus on the real estate development business. We have not entered into any new projects for construction contracts since March 31, 2006.

Other income increased to Rs. 83.81 million in Fiscal 2007 from Rs. 55.23 million in Fiscal 2006. The increase in other income was primarily due to an increase in interest income on bank deposits and dividend income by way of temporary investments in mutual fund.

### **Expenditure**

Our total expenditure increased by 65.99% to Rs. 11,173.57 million in Fiscal 2007 from Rs. 6,731.61 million in Fiscal 2006. This was primarily due to an increase in our operating income and business volume resulting in a corresponding increase in cost.

### **Operating Costs**

Our operating costs include land cost, cost of building materials, construction cost and other project related costs, and are allocated on a project basis. Our operating cost increased by 63.83% to Rs. 10,112.61 million in Fiscal 2007 from Rs. 6,172.73 million in Fiscal 2006. Our other operating cost increased to Rs. 4,412.48 million in Fiscal 2007 from Rs. 3,034.97 million in Fiscal 2006, representing an increase of 45.39%. The increase was due to additional cost incurred on account of increase in the floor area constructed by us and increase in labour costs, partially offset by a decrease in the cost of raw material.

Our construction cost increased to Rs. 1,908.85 million in Fiscal 2007 from Rs. 1,317.01 million in Fiscal 2006, representing an increase of 44.94%. The increase was due to additional cost incurred on account of increase in the floor area constructed by us. In addition, the cost of materials decreased to Rs. 1,183.55 million in Fiscal 2007 from Rs. 1,266.70 million in Fiscal 2006. The cost of materials was affected by the increase in our expenditure on steel to Rs. 877.81 million in Fiscal 2007 from Rs. 871.30 million in Fiscal 2006. Our administrative cost increased by 32.85% to Rs. 408.26 million in Fiscal 2007 from Rs. 307.31 million in Fiscal 2006. As a percentage of total income, our administrative expenses decreased to 2.84% of total income in Fiscal 2007 from 3.75% of total income in Fiscal 2006. The decrease was driven by a decrease in royalty payments, paid under the trademark license agreement to our Promoter, Mr. Rohtas Goel, to Rs. 1.00 million in Fiscal 2007 from Rs. 132.00 million in Fiscal 2006, offset by an increase in director remuneration (including employee stock option) to Rs. 95.77 million in Fiscal 2007 from Rs. 35.05 million in Fiscal 2006, an increase in legal and professional charges to Rs. 198.62 million in Fiscal 2007 from Rs. 102.51 million in Fiscal 2006, and an increase in donation to Rs. 72.22 million in Fiscal 2007 from Rs. 6.43 million in Fiscal 2006.

## FINANCIAL INDEBTEDNESS

For details of our secured and unsecured loans see the section titled "Financial Indebtedness" on page 75.

## LIQUIDITY AND CAPITAL RESOURCES

Our primary liquidity requirements have been to finance our purchases of land, working capital requirements and for development of our projects. We have met these requirements from cash flows from operations, short-term and long-term borrowings.

As of March 31, 2007, we had no capital expenditure commitments (net of advances). We have also made part payments to acquire land in various locations across India and as of March 31, 2007 the balance of the purchase price for these lands was Rs. 4,948.00 million. Our growth plans will require us to incur substantial additional expenditure in the current and future Fiscals across our existing and new business lines. We expect that our land acquisitions as well as the construction and development costs for our projects will be funded through cash flows and borrowings, as well as through the proceeds of this Issue as described in the section titled "Objects of the Issue" on page 33. For more information, see the section titled "Financial Indebtedness" on page 75. Our expansion plans and planned expenditure are subject to change based on, and our ability to raise and service the required financing depends on, various factors such as interest rates, property prices and market conditions.

### Quantitative and Qualitative Disclosure about Market Risk

We are exposed to market risk from changes in interest rates. The following discussion is based on consolidated restated financial statements prepared under SEBI Guidelines and Companies Act, 1956.

#### Interest Rate Risk

Our financial results are subject to changes in interest rates, which may affect our debt service obligations. Our long-term Rupee-denominated debts, which bear interest at floating rates linked with prime lending rates of the respective lenders, as determined from time to time, totalled Rs. 8,157.70 million as at March 31, 2007. Upward fluctuations in interest rates increase the cost of both existing and new debts. An increase in interest rates of 1% on our existing floating rate debts would increase our annual interest charges by approximately Rs. 38.58 million based upon the long-term and short-term loans outstanding as at March 31, 2007. Although we intend to repay some of these borrowings with the proceeds of the Issue, it is likely that in the current Fiscal and in future periods our borrowings will rise substantially given our planned expenditure. We do not engage in interest rate hedging.

#### Commodity Price Risk

We are exposed to market risk with respect to the prices of raw material and components used in our projects. These commodities include steel, cement and timber. The costs for these raw materials and components are subject to fluctuation based on commodity prices. The cost of components and various small parts sourced from outside manufacturers may also fluctuate based on their availability from suppliers. In the normal course of business, we purchase these raw materials and components either on a purchase order basis or pursuant to supply agreements. We intend to continue to enter into a higher percentage of

## OMAXE LIMITED

fixed price contracts with our sub-contractors pursuant to which some or all the costs of raw materials and components used in our projects are fixed at the time we enter into the contract and the risk of any fluctuation in the price of such raw materials and components is passed on to the contractor.

### **Effect of New Accounting Pronouncements**

The following are accounting pronouncements issued by the ICAI during the last three Fiscals that have had an effect on our financial reporting:

#### 1. Accounting for Taxes on Income

The ICAI issued Accounting Standard 22 (“AS 22”) for Taxes on Income, which prescribes guidelines for addressing the problem of permanent and timing differences between accounting income and taxable income. It is not applicable to taxes on distribution of dividends. Under AS 22, tax expense for an accounting period is the total of current tax and deferred tax.

Deferred tax is the tax effect of timing differences; permanent differences do not result in deferred tax assets or liabilities and hence should not be recognized. AS 22 also states that considerations of prudence should not be ignored while recognizing the impact of timing differences and prescribes conditions under which deferred tax assets should not be recognized. AS 22 came into effect for the Fiscal beginning April 1, 2001 and became mandatory for us for the Fiscal beginning April 1, 2002. This accounting standard has had an impact on our reported profit after tax as the tax impact of timing differences is now recognized as an expense or an item of income.

#### 2. Accounting for Provisions, Contingent Liabilities and Contingent Assets

The ICAI issued Accounting Standard 29 (“AS 29”) for Provisions, Contingent Liabilities and Contingent Assets, which prescribes appropriate recognition criteria and measurement bases to be applied for Provisions and Contingent Liabilities. AS 29 requires that an enterprise should disclose sufficient information to enable users to understand their nature, timing and amount. AS 29 came into effect for the Fiscal beginning April 1, 2004 and became mandatory for us from that date.

We do not believe that adoption of AS 29 has had a material impact on our financial statements and results of operations.

### **Future Relationship between Costs and Income**

### **Inflation**

In recent years, although India has experienced minor fluctuation in inflation rates, inflation has not had material impact on our business and results of operations.

### **Seasonality of Business**

Our operations may be adversely affected by difficult working conditions during monsoons that restrict our ability to carry on construction activities and fully utilize our resources. Notwithstanding, we generally do not believe that our business is seasonal.

Separate receipts shall not be issued for the money payable on the submission of Bid-cum-Application Form or Revision Form. However, the collection center of the members of the Syndicate will acknowledge the receipt of the Bid-cum-Application Forms or Revision Forms by stamping and returning to the Bidder the acknowledgement slip. This acknowledgement slip will serve as the duplicate of the Bid-cum-Application Form for the records of the Bidder.

### OTHER INSTRUCTIONS

#### Joint Bids in case of Individuals

Bids may be made in single or joint names (not more than three). In case of joint Bids, all payments will be made out in favour of the Bidder whose name appears first in the Bid-cum-Application Form or Revision Form. All communication will be addressed to the first Bidder and will be dispatched to his or her address.

#### Multiple Bids

A Bidder should submit only one Bid (and not more than one) for the total number of Equity Shares required. Two or more Bids will be deemed to be multiple Bids if the sole or First Bidder is one and the same. In this regard, illustrations of certain procedures which may be followed by the Registrar to the Issue to detect multiple applications are provided below:

1. All applications with the same name and age will be accumulated and taken to a separate process file as probable multiple master.
2. In this master, a check will be carried out for the same PAN/ GIR numbers. In cases where the PAN/ GIR numbers are different, the same will be deleted from this master.
3. Then the addresses of all these applications from the address master will be strung. This involves putting the addresses in a single line after deleting non-alpha and non-numeric characters i.e. commas, full stops, hash etc. Sometimes, the name, the first line of address and pin code will be converted into a string for each application received and a photo match will be carried out amongst all the applications processed. A print-out of the addresses will be taken to check for common names. Applications with the same name and same address will be treated as multiple applications.
4. The applications will be scanned for similar DP ID and Client ID numbers. In case applications bear the same numbers, these will be treated as multiple applications.
5. After consolidation of all the masters as described above, a print out of the same will be taken and the applications physically verified to tally signatures as also fathers/ husbands names. On completion of this, the applications will be identified as multiple applications.

In case of a Mutual Fund, a separate Bid can be made in respect of each scheme of the Mutual Funds and such Bids in respect of more than one scheme of the Mutual Funds will not be treated as multiple Bids provided that the Bids clearly indicate the scheme for which the Bid has been made.

We reserve the right to reject, in our absolute discretion, all or any multiple Bids in any or all categories.

#### Permanent Account Number

The Bidder or in the case of a Bid in joint names, each of the Bidders, should mention his/her PAN allotted under the I.T. Act. **The copy of the PAN card(s) or PAN allotment letter(s) is required to be submitted with the Bid-cum-Application Form. Further, where the Bidder(s) has mentioned "Applied for" or has not obtained PAN, the sole/First Bidder and each of the joint Bidder(s), as the case may be, would be required to submit Form 60 (form of declaration to be filed by a person who does not have a permanent account number and who enters into any transaction specified in Rule 114B of the Income Tax Rules, 1962), or, Form 61 (form of declaration to be filed by a person who has agricultural income and is not in receipt of any other income chargeable to income-

#### **Method of Proportionate Basis of Allotment in the QIB, Retail, Non-Institutional and Employee Reservation Portions**

In the event of the Issue being over-subscribed, we shall finalize the basis of Allotment in consultation with the Designated Stock Exchange. The Executive Director (or any other senior official nominated by them) of the Designated Stock Exchange along with the Book Runners and the Registrar to the Issue shall be responsible for ensuring that the basis of Allotment is finalized in a fair and proper manner.

The Allotment shall be made in marketable lots, on a proportionate basis as explained below:

1. Bidders will be categorized according to the number of Equity Shares applied for.
2. The total number of Equity Shares to be allotted to each category as a whole shall be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio.
3. Number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio.
4. In all Bids where the proportionate Allotment is less than 20 Equity Shares per Bidder, the Allotment shall be made as follows:
  - a) Each successful Bidder shall be allotted a minimum of 20 Equity Shares; and

5. If the proportionate Allotment to a Bidder is a number that is more than 20 but is not a multiple of 1 (which is the marketable lot), the number in excess of the multiple of 1 would be rounded off to the higher multiple of 1 if that number is 0.5 or higher. If that number is lower than 0.5, it would be rounded off to the lower multiple of 1. All Bidders in such categories would be allotted Equity Shares arrived at after such rounding off.
6. If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares allotted to the Bidders in that category, the remaining Equity Shares available for Allotment shall be first adjusted against any other category, where the allotted shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment will be added to the category comprising Bidders applying for minimum number of Equity Shares.

#### **Restrictions on Foreign Ownership of Indian Securities**

Foreign investment in Indian securities is regulated through the Industrial Policy and FEMA. While the Industrial Policy prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investments.

Press Note No. 2 (2005 series), published by the Government of India has permitted foreign direct investment (“FDI”) of up to 100% under the automatic route in townships, housing, built-up infrastructure and construction-development projects, subject to certain conditions enumerated therein. A short summary of the conditions is as follows:

- (a) Minimum land area to be developed is 10 hectares in case of serviced housing plots and built up area of 50,000 square meters in case of construction development projects. Where the development is a combination project, any one of the two conditions would suffice.
- (b) Minimum capitalization of US\$10 million for wholly owned subsidiary and US\$5 million for a joint venture has been specified and it is required to be brought in within six months of commencement of business of the company.
- (c) Further, the original investment is not permitted to be repatriated before three years from completion of minimum capitalization except with prior approval from FIPB.
- (d) At least 50% of the project is required to be developed within five years of obtaining all statutory clearances and the responsibility for obtaining it is cast on the foreign investor. Further, the sale of undeveloped plots is prohibited.

For the purpose of this clause “undeveloped plots” have been defined to mean those plots where roads, water supply, street lighting, drainage, sewerage, and other conveniences, as applicable under prescribed regulations, have not been made available. It is necessary that the investor provides this infrastructure and obtains the completion certificate from the concerned local body/service agency before he is allowed to dispose of serviced housing plots.

- (e) Compliance with rules, regulations and bye-laws of state government, including land use requirements and provision of community amenities and common facilities, municipal and local body has been mandated and the investor is given the responsibility for obtaining all necessary approvals.

**We have sought a confirmation from the Department of Industrial Policy and Promotion, Ministry of Commerce, Gol, by way of a letter dated November 4, 2006, that investment by FIIs registered with SEBI in the Equity Shares offered as part of this Issue would not fall within the ambit of Press Note 2(2005 Series) issued by the Gol and will therefore not be subject to the conditions specified therein.**
